TV Product Profile

Display Customer eXperience Division

Purpose of this document

This document is intended to support the successful 2026 LGE TV marketing communications and NPI launch. To this end, this document describes the product planning direction, lineup, and related core technologies of 2026 TV. Accordingly, the materials contained in this document are for use only within LGE as expressly directed, and no part of this document may be used directly as external marketing material.

This material in this document is strictly confidential and protected by international law. Any copying, duplication, modification or distribution not in accordance with an express written agreement with LG's HQ is strictly prohibited and may result in substantial civil and/or criminal penalties. The images used in this document are simulated and should not be used externally under any circumstances.

If you have any questions, please contact Hank Kang (hangjoon.kang@lge.com) or SH Lee (seho.lee@lge.com) in the Display Customer eXperience Division.

Update Information

Version	Date	Chapter	Update History
1.0	18 th , Aug	All	Initial distribution
1.1	1 st , Oct	All	1) Model Name change - UB85 → NU85, UB80 → NU80 2) USP Name change - AI Sound Pro : AI Object Remastering Pro → AI Object Remastering Ultra. Care and Manage TV Experience of you and your family

U

Usage care

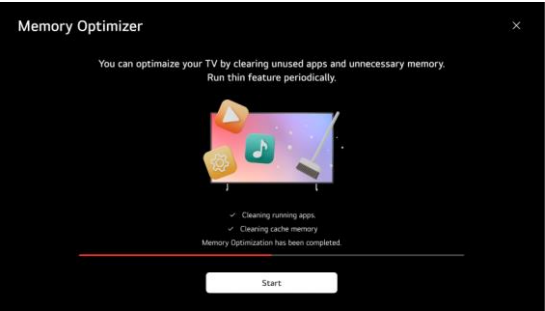

*All models with webOS26

- Check you and your Kids TV and app usage
 - Past 2 months based on your account
 - Set up Parental Control and Viewing Environment for your kids

[Path]
1) Home > Account > 'Usage Care' click

- Optimize your TV with a single click using Memory Care
 - Cleans unused apps and cached memory to maintain a smooth and responsive user experience
 - Provides a visual progress guide to enhance customer trust through intuitive UX

[Path]
1) Settings > Support > Memory Optimizer
* Setting > Support > Memory Care(renamed in MR1)
2) Home > Account > Usage Care > 'My Usage' tab

Differentiation

- Differences compared to '25
 - Conformity Declaration serves in some countries ('Family Care' tab, France & Italy)
This TV has a parental control system - Parents can activate and use the parental control system to improve their children's digital safety and to limit and control access to inappropriate digital content.
 - In 2026, the Memory Optimizer became more visualized and was upgraded to clear cache memory and recently used apps, providing a smoother experience even after closing apps.

Competitive Advantage Points

	Company	Competitor
Category	Usage Care You can control your digital health by checking TV usage patterns based on your account, and if you have children, you can create child protection settings and viewing environments and monitor viewing patterns.	Device care
Memory Optimization	Provides a dedicated screen for memory optimization, allowing direct user control	memory optimization is not a standalone feature and is part of broad system management

- Disclaimer
 - Family Care Options may vary by region/ country.

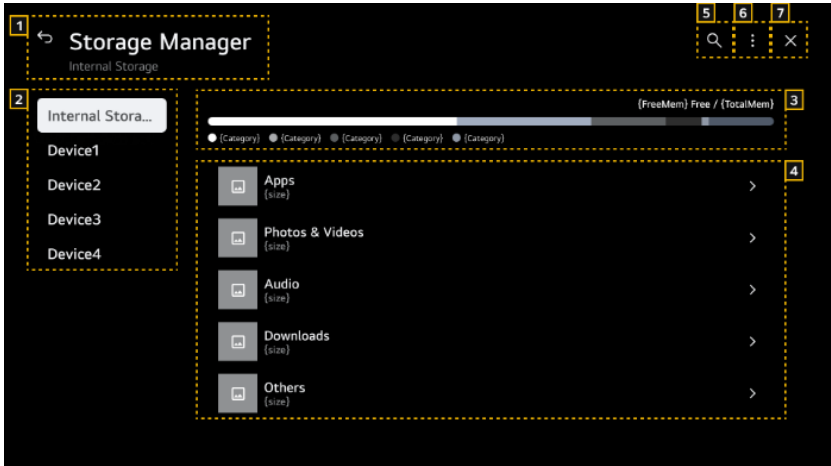

Manage your TV memory performance efficiently with Storage Manager.

U

Storage Manager

*All models with webOS26

- Overview
 - Storage Manager lets you easily browse and manage all files on your TV—such as downloaded apps, photos, videos, and audio at a glance. It supports deleting, launching, and sharing files for a seamless experience.

- Key Features
 - Easily delete unused or accumulated files to free up eMMC storage space
 - Browse, launch, and share various stored files (including LG Link)
 - View and manage files from USB or external devices all in one place

[Navigation Path]

1) Settings > Support > Memory Care > Storage Manager

2) Home (Apps) > Storage Manager

Differentiation

- Differences compared to ‘25
 - New feature launching with 2026

Competitive Advantage Points

Company	Competitor (SS)
Manage downloaded apps and all created/downloaded files	Only able to manage the downloaded app list

The webOS is equipped with **LG's unique security system "LG Shield"**, which keeps customers' sensitive information and data safe.

U

'26 New

LG Shield

* All models with webOS26 SoC O26, K26 / K25Lp / LM24F

Initial

▪ **Application of security process (LG-SDL) and platform security technology**

1) LG Shield's proprietary security solution ensuring product and data protection across the entire product lifecycle (development, deployment, and maintenance).

2) Built with a thorough security solution centered on the "7 Core security technologies"

1) Secure data storage, 2) Secure data transmission, 3) Secure user authentication, 4) Ensure software integrity,

5) Secure updates, 6) Secure cryptographic algorithms, 7) Security event detection

MR1

▪ **Provide the LG Shield logo to make customers aware that secure security systems are in place**

1) When TV AC Power On, Reboot after SW Update

2) TV Off: Logo Exposure (1.5s) → LG Logo Exposure (1.8s)

3) Provide a shortcut to webOS Security Center on the My Page

MR1

▪ **New "webOS Security Center" menu in webOS featuring LG Shield's unique security technology and TV security report notifications.**

1) Provide a link to the LG Shield technology homepage (<https://lgshield.lge.com>)

2) Bug Bounty Security Report Homepage Link (<https://lgsecurity.lge.com>)

[Path to use]

1) Settings > Support > Privacy & Terms > "webOS Security Center"

Differentiation

▪ Differentiation compared to '25

- All webOS26-based TVs have acquired LG Shield certification
- webOS Security Center function to notify customers of security status and updates
- Expose the LG Shield logo on the TV to notify customers that it has enhanced security features.

▪ Competitive Advantage Points

- LG Shield, LG's unique security solution, is applied to meet security requirements and provide customers with a safe environment to use their TVs.

▪ Required disclaimer

- LG Shield certification may vary depending on model.

The decision to equip some products will be made based on the outcomes of the certification criteria discussions and performance evaluations

Experience a whole new TV journey with LG webOS — enjoy free upgrades for up to five years through our dedicated Re:New app.

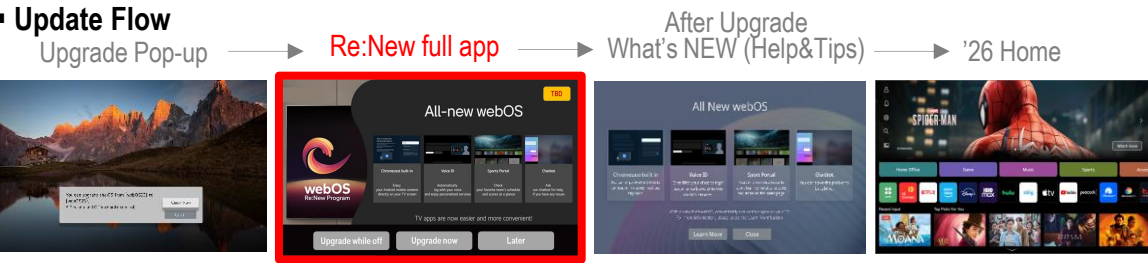

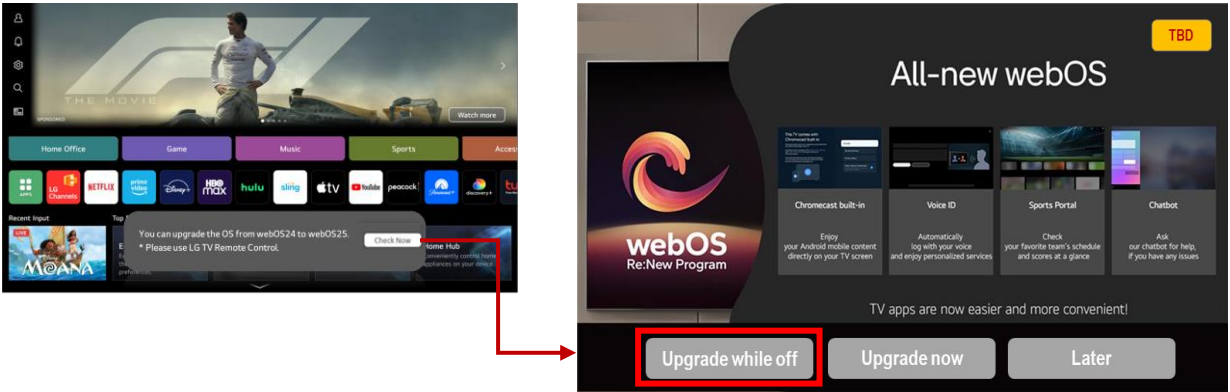

F

Re:New Program

*webOS22 OLED, QNED8K TVs

webOS23/2425 OLED/QNED/NanoCell/UHD TVs.

- **LG Smart TV is the world's first to support Smart TV OS upgrades** for up to five years.
- **Upgrade your TV just like a smartphone — even when it's off, with a full-screen experience** — and explore the new features and services of the evolved webOS.
- **App execution speed stays at its best** even after the webOS renewal upgrade.

Card Display Policy: The order of the cards is fixed, but default cards are defined according to the Foreground App ('that' card is expanded)

- In LiveTV or HDMI, pressing the AI key on the remote prioritizes the 'In This Scene' card by default
- In Home or Others, pressing the AI key on the remote prioritizes the 'AI Keyword' card by default

▪ **AI Keyword card** Always displayed

- Category 1 : Personalized search keyword recommendations tailored to your interests — based on what you search and watch.
- Category 2 : Usage tips provided depending on the foreground app.

▪ **In This Scene** Displayed only when a program is recognized via LiveTV or HDMI

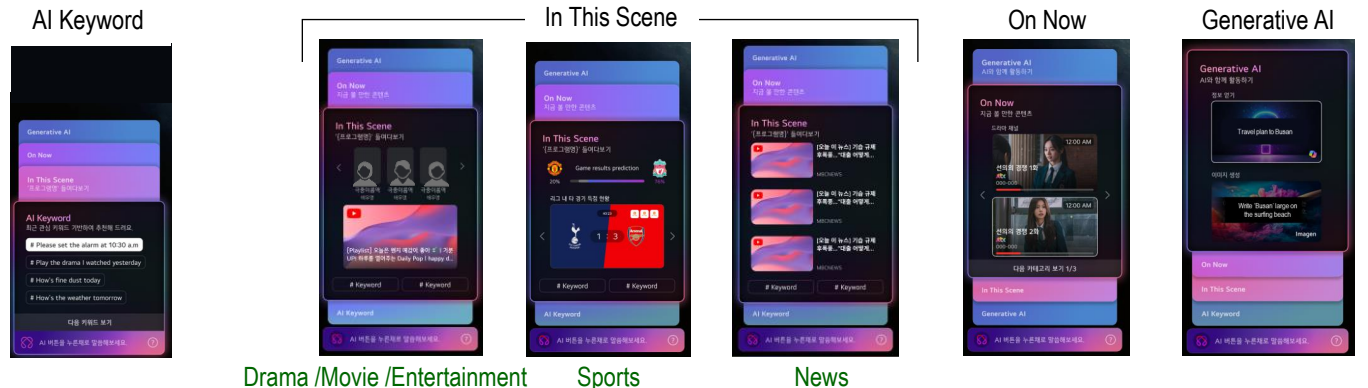

- Drama, Movies, Entertainment : Cast profiles, YouTube clips, related keywords to search.
- Sports : Game result prediction, progress of other matches in current league, real-time information search button.
- News : Today's top headlines (YouTube clips), related keywords to search.

▪ **On Now** Always displayed, except in Netflix and other CP apps

- When foreground app is LiveTV (including set-top box) : Related content recommendation based on the broadcast you are watching.
- When foreground app is Others : General recommendations are server-based, recommended according to account usage patterns and content popularity.

▪ **Generative AI** Always displayed

- Prompt recommendations related to the genre of what you're watching, seasons(weather), time of day, etc.

Long press the AI key on your remote to resolve any issues while using the TV

U

AI Chatbot

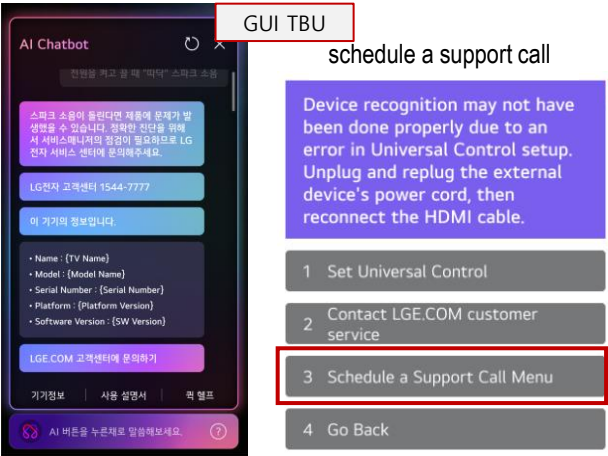

*All models with webOS26, Global, 26 Initial

- Understanding natural language questions about problems, and provide solutions
 - If problem situation of the TV is detected, proactively suggest to the user if assistance is needed.
 - And then identify the root cause of TV symptoms through step-by-step conversation.
 - When settings can be changed directly within the Chatbot, users can make changes immediately without switching apps.
 - If self-resolution is difficult, it provides the customer service phone number, web links, and the user's device information.
 - When in a supported service country, it can provide 'Schedule a Support Call' option and allow the user to the app.

Proactive AI Recommendation

Voice recognition

[User Flow]

- 1) [remote] AI button long press → Voice recognition
- 2) Q-settings > AI Chatbot icon
- 3) Accessibility app > AI Chatbot icon
- 4) Click Nudge (Proactive AI Recommendation) for Troubleshooting

Differentiation

- Differentiation compared to `25
 - Even if user does not enter the chatbot, proactively suggest if problem detected. (AI Recommendation)
 - Improved overall visibility compared to before
 - There were additional responses in `26
 - Troubleshooting : about Remote pointer, Customize remote button's action, Connect IoT devices, Share smartphone screen, etc.
 - TV function introduction : about Generative AI

Competitive Advantage Points

	LG TV	SS TV
Troubleshootig	Self-diagnosis support, Step-by-step analysis for issues, Manual search	Manual search, Web Browser search *Support Multi-turn conversation

- Required disclaimer
 - In some countries (countries where NLP is not supported), app access and usage via voice may not be available.

webOS provides individuals with personalized recommendations for TV features or service features based on segments in the form of nudges.

F FirstU UniqueN New

U

Proactive AI Recommendation

*All models with webOS26, Global, 26 Initial

- Definition
- AI Recommendation (formerly Nudge) refers to a pop-up that provides appropriate guidance based on the situation or displays content that requires real-time verification and recommendations.

- It provides relevant messages, apps, or content alongside the suggested information to allow users to access the corresponding features or content.

- 4 Cases that can be executed/applied in AI Recommendation after users select the AI key:

1) Go to App/Service, 2) Apply Settings, 3) Go to AI Concierge, 4) Go to NLP result*

* Output or outcome generated by a Natural Language Processing (NLP) search system

AI Recommendation type

Light type	Heavy type
Consists of one or two sentences of text, and users can press the AI key or select the UI to execute it. Disappears after N seconds if there is no user action.	Includes multiple sentences, images, and buttons in form of notifications or recommendations set by users in the TV apps. Users can select the appropriate button UI to execute an action. Disappears after N seconds if there is no user action

Differentiation

- Differentiation compared to `25
- Provide personalized nudges based on voice usage.
- Competitive Advantage Points
- By providing nudges linked to the user's LG account, users can receive recommendations for 'content/operations/services' at appropriate times without interrupting their media content viewing.
- Required disclaimer
- From webOS26 initial, most of nudges will be provided based on LG account login, and only the following two will be provided when the LG account is NOT logged in:

1) Nudge to resolve TV error situation after self-diagnosis.

2) Default nudge within the device (e.g. HDMI input switching suggestion)

[User Flow]

- Nudge Trigger Timing: when logic is satisfied

- Nudge setting location: Settings > General > AI Services > AI Services Settings > AI Recommendation Settings

F First U Unique N New

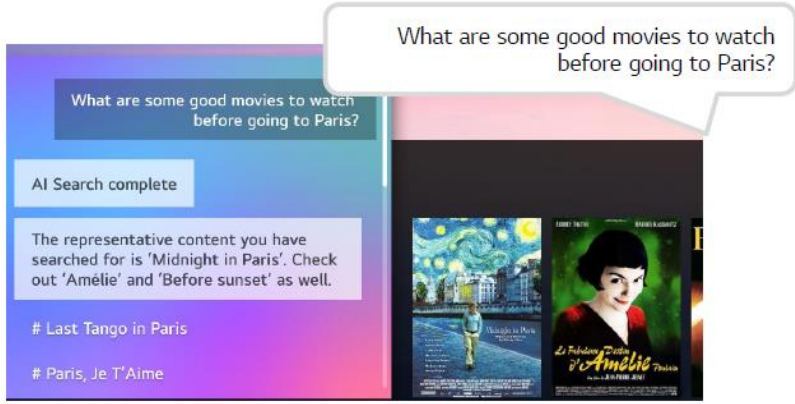

Powered by large language models, AI Search can now understand and respond to questions that were previously too complex to answer.

U

AI Search with LLM

Feature introduction

- By leveraging large language models, our system intelligently analyzes user utterances to understand their true intent. This enables more accurate comprehension of user queries and delivers highly personalized, optimized content recommendations in real time.

Content Search Query Examples	Movies based on real murder cases
	Movies based on cartoons
	Famous romantic ship-sinking movies
	Show me the movie Youn Yuh-jung won a academy award
	Show me the movie with baby pigs and spider web
	Recommend movies to watch before visitng France
	Recommend movies showing life stories of famous musicians

- [User Flow]
- 1) Press & Hold the 'AI Button' on the AI Magic Remote
 - 2) Say what you are searching for

Differentiation *All models with webOS26, April 2026

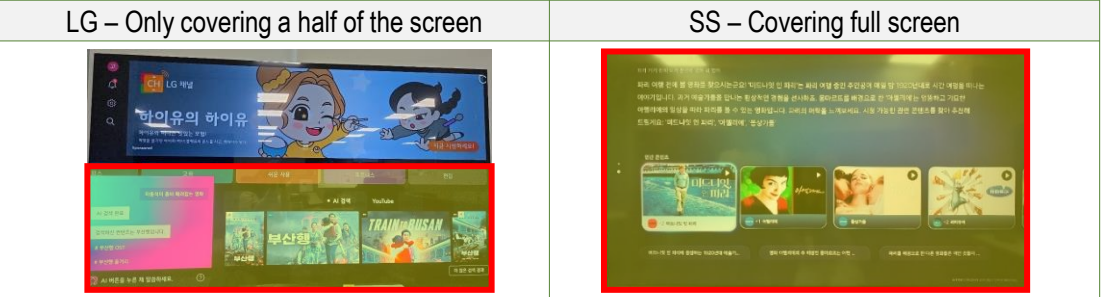

Differentiation compared to `25

- AI Search was available in Korea and the U.S. in 2025
- This feature is getting expanded to more countries and languages in 2026 to enabling a broader range of users to experience its powerful capabilities.

< webOS25 >		< webOS26 >		30 countries
NA	USA	NA	USA, Canada	
EU		EU	UK, Germany, Spain, Poland, Italy, France, Netherlands, Portugal, Greece, Sweden, Denmark, Norway	
SCA		SCA	Brazil, Mexico	
MEA		MEA	Turkey, Israel, Saudi Arabia, UAE, Egypt	
Asia	Korea	Asia	Korea, Vietnam, Taiwan, India, Thailand, Indonesia, Japan, Australia, Hong Kong	

Competitive Advantage Points

- While competitors provide LLM-based responses in full screen, our service delivers answers within the AI Concierge interface, ensuring an uninterrupted viewing experience for customers.

Required disclaimer

- AI Search is supported by default in the U.S. and Korea, while in all other countries it is supported only when Gemini is selected in Multi-AI.

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. Upgraded AI with Multi-Agent Search for a more powerful and intuitive voice-based search experience.

U

Multi AI Search

*All models with webOS26 Global (excluded China, Russia TBD)

- Delivers an advanced search experience powered by collaboration with **Multi AI-Agents**
 - Enhances the ability to find anything users want through improved UX and multi-AI
 - Delivers **General Info** related in-depth search results via multi Ai-Agents

- #Ask Copilot, #Ask Gemini Icon will appear on the search results, on which you can click and have answers shown in a mini browser
- MS Copilot**
 - Displays results in the Mini Browser with session continuity on re-entry. When selected, the voice UI is hidden and the Mini Browser is shown. Copilot Mic or link actions open in the Full Browser.
- Gemini**
 - Delivers AI service results directly within the voice search results screen, with selected sources viewable through the Mini Browser. Users can switch to a full view via the “Full Browser” button.

[User Flow]

- 1) Press & Hold the 'AI Button' on the AI Magic Remote
- 2) Say what you are searching for
- 3) Select preferred AI Agent

Differentiation

General Info search examples

Query Examples	Schedule a 4days travel to Japan
	Why does ii smell if you laundry in Summer?

- Differentiation compared to `25
 - Empowers users to choose their preferred AI model by offering multiple entry points in voice search results.
 - Differentiated UX with session continuity and seamless transition between Mini and Full Browser.
 - Expands from content-centric queries to in-depth handling of general knowledge and non-content domains.
- Competitive Advantage Points
 - Multi-agent approach with Microsoft and Google AI, offering users choice between Copilot and Gemini for greater accuracy and personalization.
 - Transparent UX with inline results, one-click Full Browser transition, and session continuity.
- Required disclaimer
 - Partner AI services are subject to change or require a subscription
 - Features may vary by region and model.

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Recognizes you with your voice pattern to provide your customized services

F

AI Voice ID

*All models with webOS26, Global (Excluding Russia)

Feature introduction

- Once my voice is registered, **LG AI understands the user's voice**, automatically changes the account, and provides services tailored to the account holder.

))) **Anytime, anywhere, "my account."**
Only when Voice ID is registered and set to on

 you have signed in with jakes01

))) **"Personalized picture setting", "let me know my team's real-time score "**
Sports, Fitness, Games, Music, Home Office, Home Hub, Apps, etc

 Your team's score will be displayed in the **sports app**.

))) **"Find an interesting movie"**
If a voice is recognized in different account from the one you are currently logged in to, it will be switched to that account and the appropriate results will be displayed for that account.

It is an item that analyzes the genre based on the data searched by the user and provides it

 These are the movie recommendations for **Park**. What would you like to see?

Differentiation

- Only one account is linked to one voiceprint.

Competitive Advantage Points

	LG TV	SS TV
Voice ID	O	- (applied to refrigerator)
ID recognition-based function	Personalized Home/ Account-Based Content Recommendations, Sync to personalized service such as Sports/Fitness	(refrigerator) check schedule, view photos

- Required disclaimer
 - The lock can be unlocked by someone with a similar voice, and if the voice changes due to health reasons or other factors, recognition may not work effectively

- [Usage Path]
- 1) Settings > General > AI Service > Voice Recognition Settings > Voice ID
 - 2) Turn on Voice ID
 - 3) Register Voice ID

	Y2026

F First

U Unique

N New

With LG Link, you can wirelessly share files and images between your TV and other devices with a single connection and keep tabs on your TV.

N

LG Link

'26 New

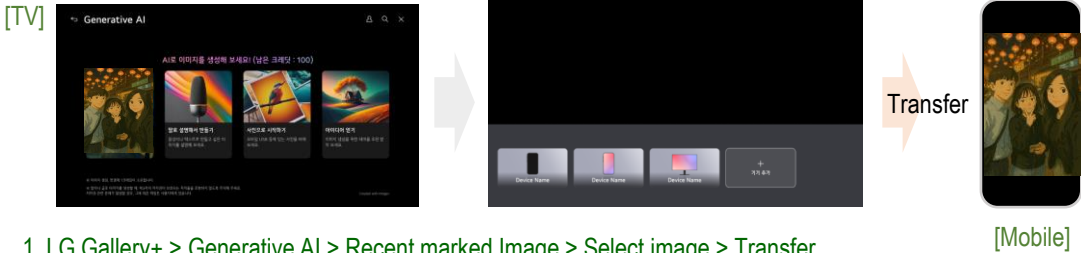

*All models with webOS26, Global, 26 MR1

- Transfer the generative image at TV for myself to PC (Gram) or Mobile device and Images or files (PPT, PDF, etc.) stored on PC (Gram) or mobile device can be transferred and saved to the TV wirelessly.

TV → PC/Mobile

“Transfer the generative images for myself to my mobile”

- LG Gallery+ > Generative AI > Recent marked Image > Select image > Transfer
 - Select device(PC or Mobile), If you don't register Mobile or PC, need to register that
- ※ You have to install Gram link on your Mobile or PC

PC/Mobile → TV

“Transfer the images in my PC to TV”

- Gram link App of PC > Select 'Send Tap'
- Select images and device you want to send (TV), If you don't register Mobile or PC, need to register that

Differentiation

New

- Differentiation compared to `25
 - In addition to simple content sharing from mobile to TV, it also increases connectivity between products, improves usability, and enhances user experience.

Competitive Advantage Points

	Company		Samsung
File Transfer	PC ↔ TV ↔ Mobile	>	PC ↔ Mobile (TV not available)
Controllability	PC ↔ TV ↔ Mobile	>	PC → TV ← Mobile

- Required disclaimer
 - Depending on device performance, file transfer speed and quality may vary.
 - The speed may vary depending on the size of the image and file you transfer and the network conditions.
 - This function can use an external storage device when using the service according to the device memory specifications.
 - Some file extensions may not support the transfer feature depending on your device specifications.

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are LG's internal measurements using its own test methodology.

Sync your Philip Hue lights to the contents played on LG Smart TVs

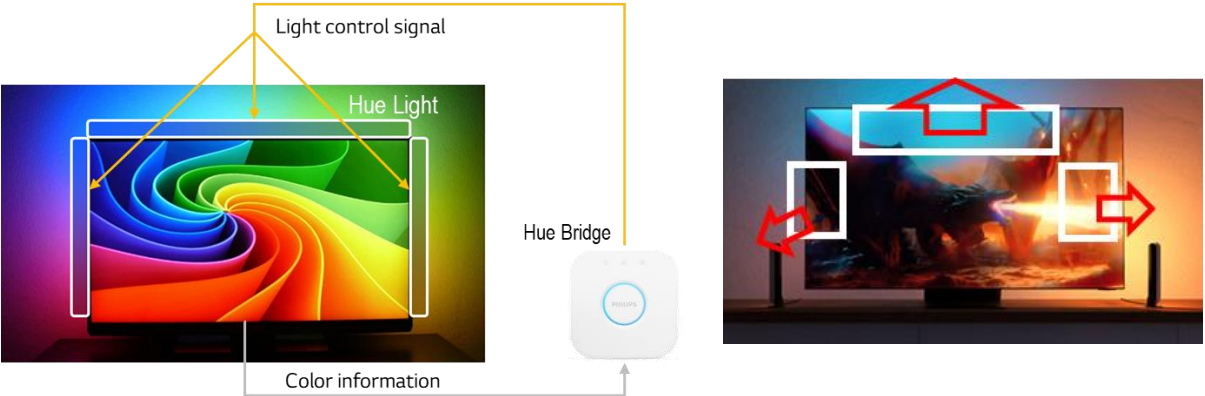

F

Philips Hue Sync

*Every LG Smart TVs from 2024: the support for FHD/HD models to be released in 2026 is still TBD

- Immersive content watching/gaming experience with surrounding lights
 - Users of Philip Hue lights can link LG Smart TVs to their light setups
 - Hue Sync app*) allows Philips Hue lights to be synced with the color of contents being played

Detailed configurations including setting up entertainment zone(setting up the location of lights and a TV) should be done using mobile Hue app

Overall setup and control flow

Example of color extraction and light sync-up

*) Hue Sync app need to be downloaded from Apps(LG App Store) and purchased separately ; 1 time purchase \$129, subscription \$2.9/month (w/o VAT)

- 33 countries are supported(United Arab Emirates, Argentina, Austria, Australia, Belgium, Brazil, Canada, Switzerland, Chile, Czech Republic, Germany, Denmark, Spain, Finland, France, United Kingdom, Hong Kong, Ireland, Italy, Japan, Korea, Luxembourg, Mexico, Netherlands, Norway, New Zealand, Poland, Portugal, Sweden, Singapore, Slovakia, Turkiye(Türkiye), U.S.A) as of July '25

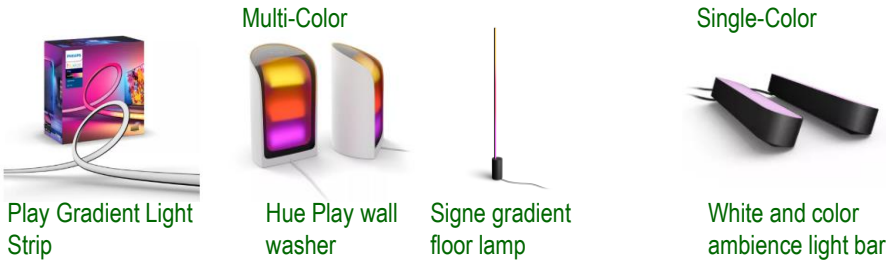

Differentiation

- Differentiation compared to legacy products
 - Smart Lights can be used with LG TVs as part of Home IoT(Smart Home), however, the level of control of surrounding lights remains at the very minimum and lights can be not dynamically changed as per the contents being played on TV
 - Philips also have Hue Sync box(\$250) which basically provides users with the similar functionality, but it can only sync with contents delivered via HDMI connections while Hue Sync app on LG Smart TVs can also manage contents played on OTT

Requirement

Additional Devices

- To use Hue Sync app on LG Smart TVs, following devices are required
 - Mobile Hue app downloaded on a smart phone
 - Hue Bridge: the main hub of Hue Light eco system
 - Hue smart lights: any Hue Light can be used but multi color lights such as Hue Gradient light can provide with elevated use experience
 - LG Smart TVs from 2024
 - Hue Sync app downloaded from Apps(LG App Store) and purchased

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

Ultra-high color Brightness technology that makes brighter and richer color through the algorithm of α11 AI Processor

F First U Unique N New

N

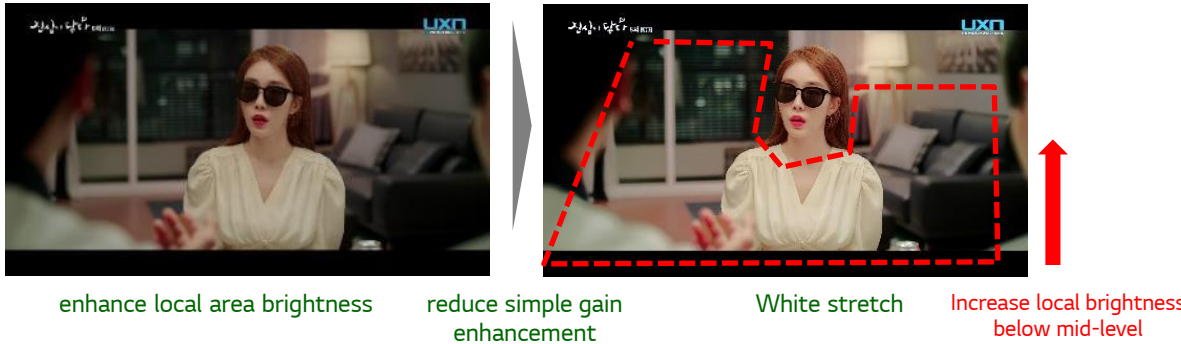

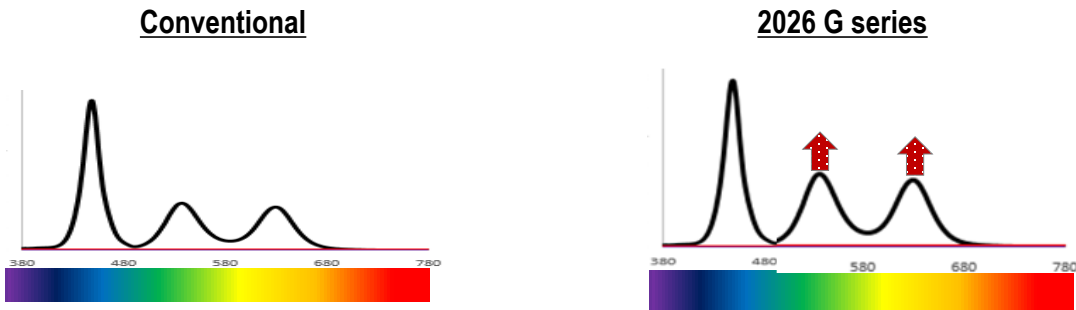

Light Control Architecture

- One of New **Light emitting structure** and advanced heat dissipation technology (**Lighting Control Architecture**) enables **the brightest OLED TV** ever
- The 4-Stack tandem emitting device, which has been applied since 24 years, has been further improved to provide a more vivid and wide color.
G5 → G6 (65") 20% brighter in HDR APL 3%, 13% in APL 10% , 21% in APL 100%

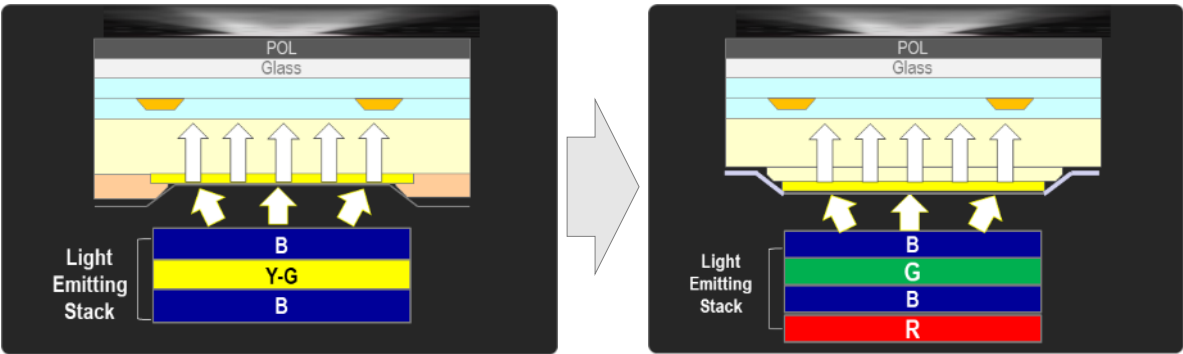

U

Light Boosting Algorithm

- Analyzes the screen and applies a **new local contrast algorithm** that enhances the brightness of dark local areas compared to bright local areas, resulting in a clearer and more detailed representation of the entire screen

C5 → C6 (65") 40% brighter in HDR APL 3%, 38% in APL 10%, 38% in APL 100%

		Ultra High Brightness	Light Control Architecture	Light Boosting Algorithm	Model
Hyper Radiant Color Technology	Brightness Booster Ultra (3,000nit↑ in HDR APL 3%)	●	●	●	83/77W6 83/77/65/55G6
	Brightness Booster Pro		●	●	48G6 83/77C6
-	Brightness Booster (1,000nit↑ in HDR APL 3%)			●	T6, 97G6 65/55/48C6

Ultra High Brightness means over 3,000nit in HDR APL 3%.

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

6. OLED Technology Leadership

Provides perfect OLED picture quality just like original work in a general home environment

F

Perfect Black & Color

*Apply to : 2026 OLED TVs (except T6)

- IDMS 11.5 Ring Light Reflect Measurement Criteria, "**Perfect Black**" by UL when Black luminance is **less than 0.24 nit at 500 Lux ambient light**
- IDMS 11.5 Ring Light Reflect Measurement Criteria, "**Perfect Color**" by UL when Color Consistency levels is **more than 99% at 500 Lux ambient light** (except B6E)

U

Glare Free

*Apply to : 2026 OLED TVs (except T6)

- "**Discomfort Glare Free**" certified by UL
- The verification is issued only when the **UGR** is less than 22 when watching TV between 70 lux (lx)**, which is about the brightness of the light from a bright window

*SCI : Specular component included
** Uncomfortable Glare Ratio

U

Perfect Color/Brightness Accuracy

*Apply to : 2026 OLED TVs (except T6)

- LG OLED Displays are certified "**Perfect Color / Brightness Accuracy**" with 100% color/brightness accuracy and no color crosstalk, **even in bright ambient light (500 lux)**
100% Color Accuracy and Color Crosstalk free is tested according to CIE DE2000

U

Reflection Free Premium

*Apply to : 83/77W6, 83/77/65/55G6

- LG OLED Displays are certified "**Reflection Free Premium**" with a reflectivity of **0.3%**, reproduce OLED's perfect black even in bright environments.
SCI* Criteria, 'Reflection Free Premium' is certified when the reflectance value of the display measured **at a wavelength of 550 nm is less than 0.5%**

LG OLED and QNED TVs support **100% Color Reproduction** to express rich and accurate color

U

100% Color Fidelity

*Apply to : 2026 OLED TVs (except T6)

- **Accurate color of the original image** without distortion or exaggeration even in environment **with bright ambient light (500lux)**

100% of the sample colors match the original colors

Color Fidelity (%) =

$$\frac{\text{\# of color difference with less than 2 value}}{\text{\# of measured color difference}} \times 100$$

Color difference (ΔE) :

CIE DE 2000 values between the target value & measurement value of 125 color patterns

Delta E(ΔE) : <= 1.0 Not perceptible by human eyes,
1~2 : Perceptible through close observation,
2~10 : Perceptible at a glance

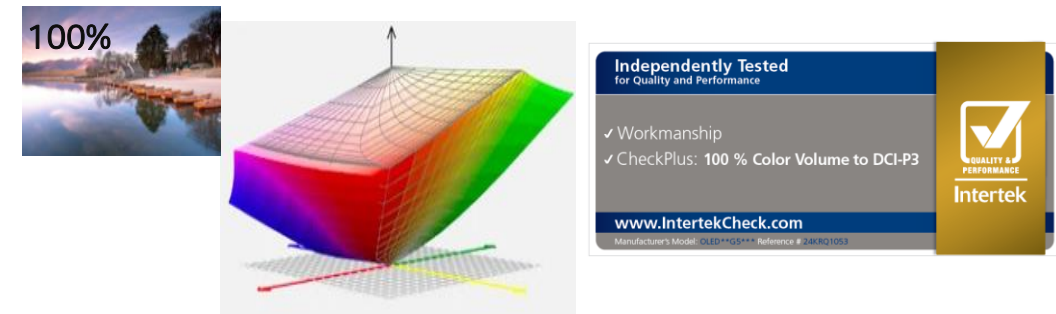

Certified by Intertek that 100% Color Fidelity measured to CIE DE2000 with 125 color patterns

U

100% Color Volume

*Apply to : 2026 OLED / QNED TVs (except T6)

- **Rich and accurate color** even with various image of each brightness levels

100% Color Volume

Color Volume (%) =

$$\frac{\text{The volume of measured display data}}{\text{The volume of standard (DCI-P3) data}} \times 100$$

Measure the luminance and chromaticity coordinate

Based on DCI-P3 measuring 8 color coordinate with 17 level of luminance

The measurement data for all defined colors shall be transformed into the 3-dimensional color space

Certified by Intertek that 100% Color Volume for DCI-P3 according to IDMS 1.1 (cl. 5.32)

6. OLED Technology Leadership

LG OLED's blue light reduction technology helps with eye health and comfortable sleep

N

Circadian Performance Factor

*Apply to : 2026 OLED TVs (except T6)

- offer a solution of OLED new circadian performance factor to sleep disruption is tested and validated by UL

CPF value > 35

- CPF = -0.12 * MEDL + 93
- MEDL = Luminance * MDER
- MDER = MELR* (test) / MELR (D65)

Considering the intensity of the light source and the Melanopic efficiency at the same illumination as the D65 standard light source based on the international standard CIE, the lower the MEDL, the lower the level of melatonin inhibition, which is more helpful for comfortable sleep

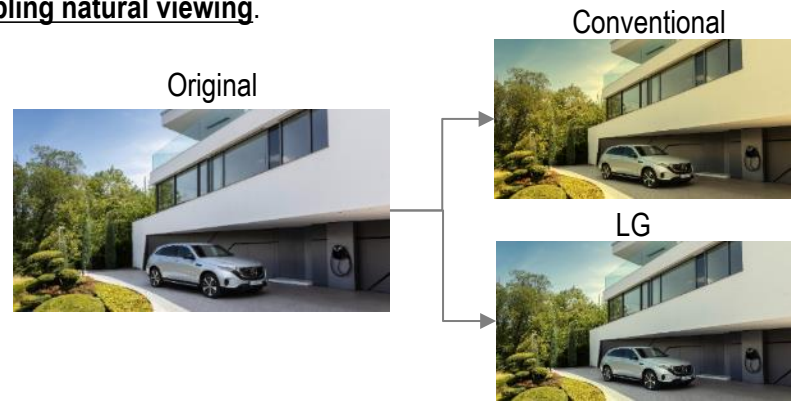

*MELR: Melanopic efficacy of luminous radiation

U

Blue Light Reduction

*Apply to : 2026 OLED / MRGB / QNED / UHD TVs

- In the LG Eye-comfort mode, the intensity of Blue Light for each pixel is adjusted according to the amount of color sensitive to the eye, minimizing color distortion, enabling natural viewing.

U

Radiance Protection Factor

*Apply to : 2026 OLED TVs (except T6)

- provide a new OLED radiance protection factor that measures blue light protection at peak toxicity and validated by UL

RPF value > 35

- $RPF = 260 \times \frac{BLTF_{D65} - BLTF_{Tested}}{BLTF_{D65}}$
- $BLTF_{D65} = 0.098$
- $BLTF_{Tested}$ = The BLTF of the tested sample

Blue Light Toxicity Factor (BLTF) corresponds to the ratio of the display's blue light effective radiance over the calculated display's luminance. The Radiance protection factor (RPF) for display is calculated based on the blue light toxicity factor. Higher RPF numbers indicate greater reduction of toxic high-energy blue light emissions.

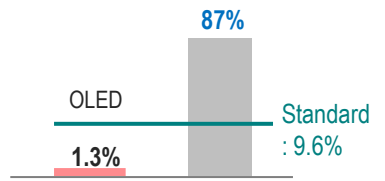

* BLTF : Blue Light Toxicity Factor

U

Flicker Free

*Applied to : 2026 OLED TVs (except T6)

- Eye comfort TV without flickering

Calculate the modulation of the maximum and minimum signal values in the time domain without changing the frequency and authenticate if the values are less than the reference values given in the IEEE standard (9.6% for 120Hz TVs)

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

The best reliable OLED technology with 11 years of Know-How that assure you enjoy for a long time.

U

OLED Care Program

- Recommend setup mode linked to customer’s watching tendency

Care Picture Settings 	- Recommend smooth picture mode - Adjust brightness for viewing environments Comfort mode → Standard mode / Light sensor on Theater mode → Cinema mode / Light sensor on Kids Care mode → Standard mode / Light sensor on Reducing blue light
OLED Panel Care 	Prevent image sticking Pixel Cleaning / Screen Move / Adjust Logo Brightness / PC Screensaver / Care Recommendations

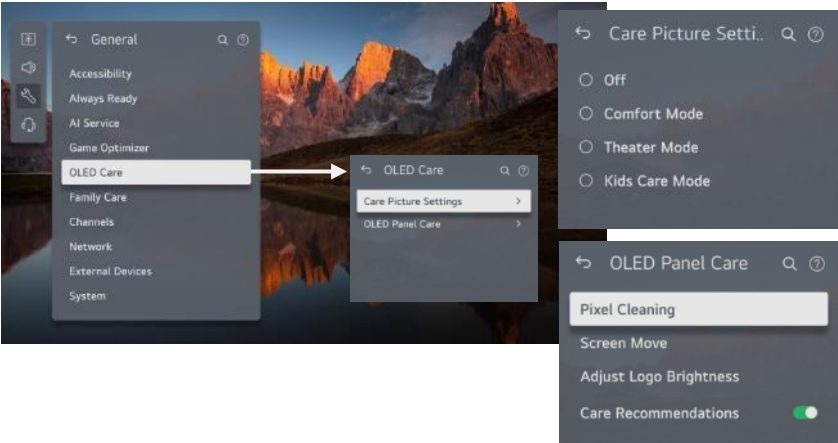

U

5 Year Warranty

OLED Care Program starts with consumer consent to Smart TV Terms.
TV provides customized recommendations to ensure 5-year panel performance after analyzing customer’s watching tendencies and TV performance for one year.

7. Micro RGB / Mini RGB / QNED Technology Leadership

UPDATED

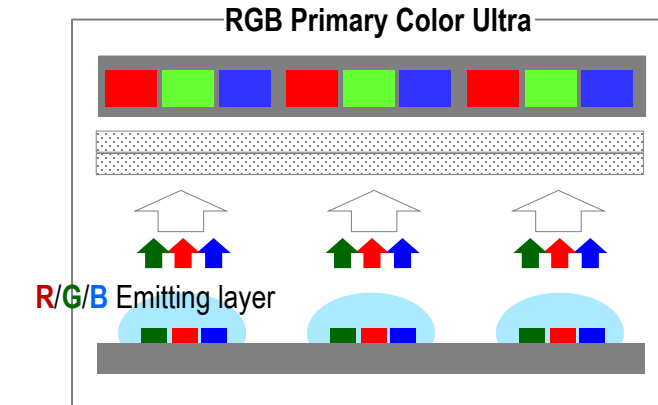

Micro RGB evo / Mini RGB evo

F First U Unique N New

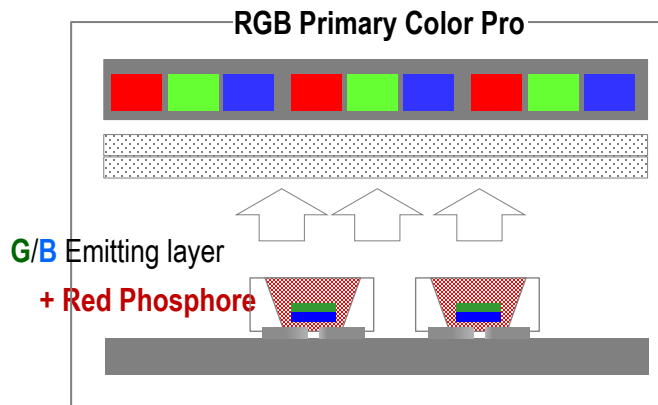

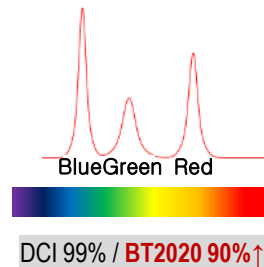

Introducing new high-color reproduction LCD TVs that have evolved to the next level with new RGB Color reproduction technology

RGB Primary Color

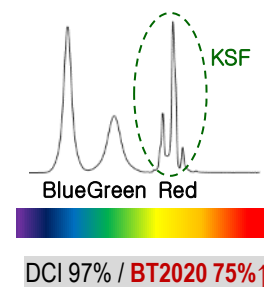

- RGB Primary Color is LG's new color reproduction backlight technology, which consists of a micro-unit light emitting layer smaller than the previous MiniLED. This new technology enables high color reproduction based on BT2020, which is wider than the current DCI-P3 color space.

*Apply to : MRGB95B

*Apply to : MRGB9MB/85B

NEW

High Purity RGB Spectrum Display

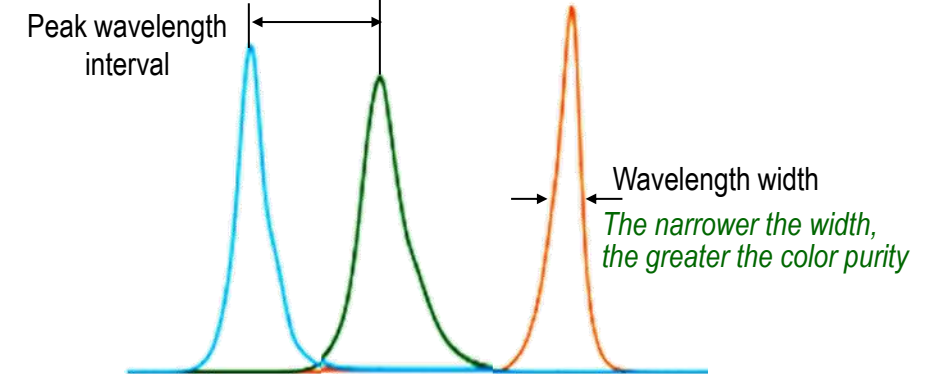

*Apply to : MRGB95B / MRGB9MB / MRGB85B

- LG Micro / Mini RGB evo TVs are certified by TÜV Rheinland as a "High Purity RGB Spectrum Display" with clear color separation between R, G, and B colors and high purity of each color

※ The certification ID varies by model

The larger the distance between colors,
the greater the separation of colors

LG Micro RGB TV delivers true color expression with triple 100% color coverage and ultra-fine color control

U

Triple 100% Color Coverage

- LG Micro RGB evo is certified “Triple 100% Color coverage” by satisfying the level of Delta E(ΔE) that the difference between the output color expression accuracy and the original color expression accuracy is hardly recognized by customers.

Gamut Area Ratio (%) = $\frac{\text{Measured Gamut Area}}{\text{Reference Gamut Area}} \times 100$

Measured Gamut Area: The area of the triangle formed by the display's RGB primary coordinates in the CIE 1976 u'v' chromaticity diagram.

Reference Gamut Area: The area of the triangle formed by the RGB primaries of the reference color space (e.g., Adobe RGB, DCI-P3, or Rec.2020)

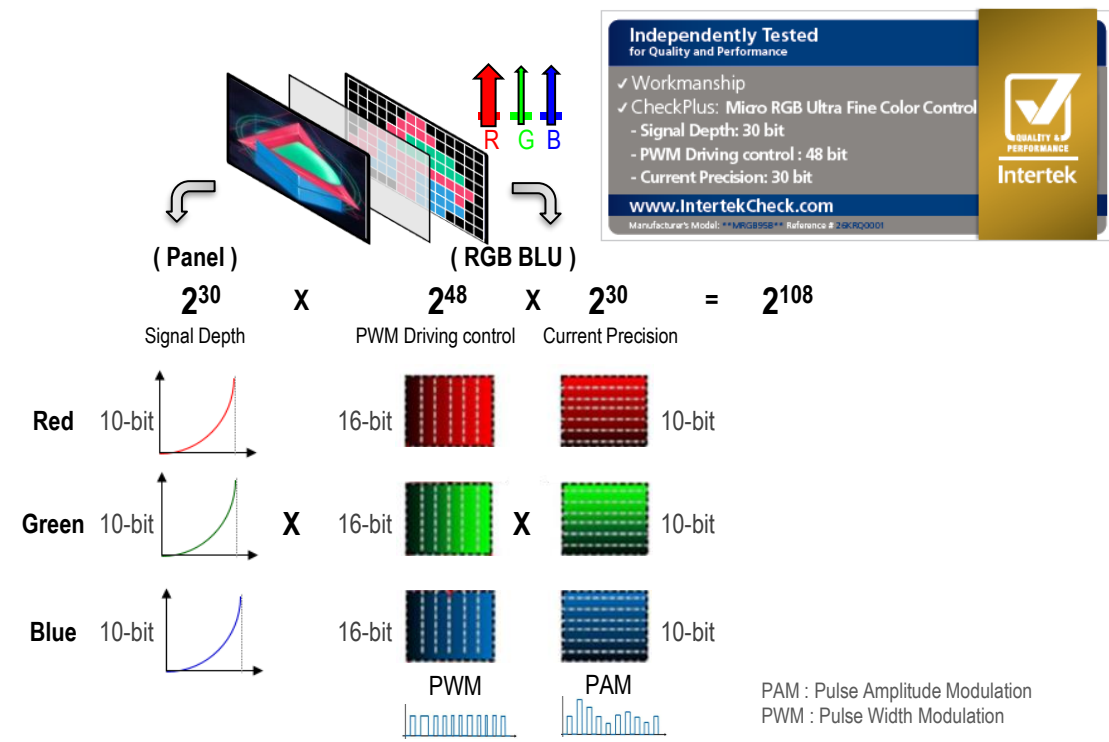

Certified by Intertek that Triple 100% Color Coverage for BT2020, DCI-P3 and Adobe RGB according to IDMS 1.2 clause 5.18

U

Ultra Fine Color Control

*Apply to : MRGB95B

- LG Micro RGB evo is certified “Micro RGB Ultra Fine Color Control” which is defined as a quantitative representation of the digital control granularity for color expression. It is calculated from the measurement data for each element of the panel consisting of RGB cells and the BLU consisting of RGB LEDs in the signal domain.

Certified by Intertek “Micro RGB Ultra Fine Color Control» according to IDMS ch.6 Gray & Color Scale measurements.

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

Dynamic QNED Color technology expands QNED’s color expression more widely

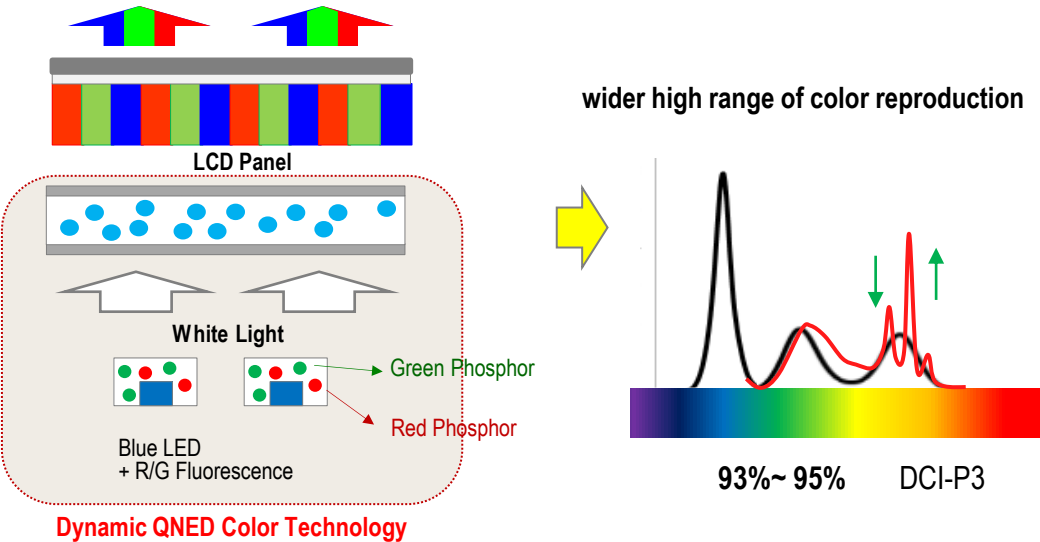

F First U Unique N New

U

Dynamic QNED Color

*Apply to : 2026 QNED TVs

- New QNED increases color reproduction rate from the range up to 93~95% by converting blue light to white, absorbing and purifying unnecessary light wave

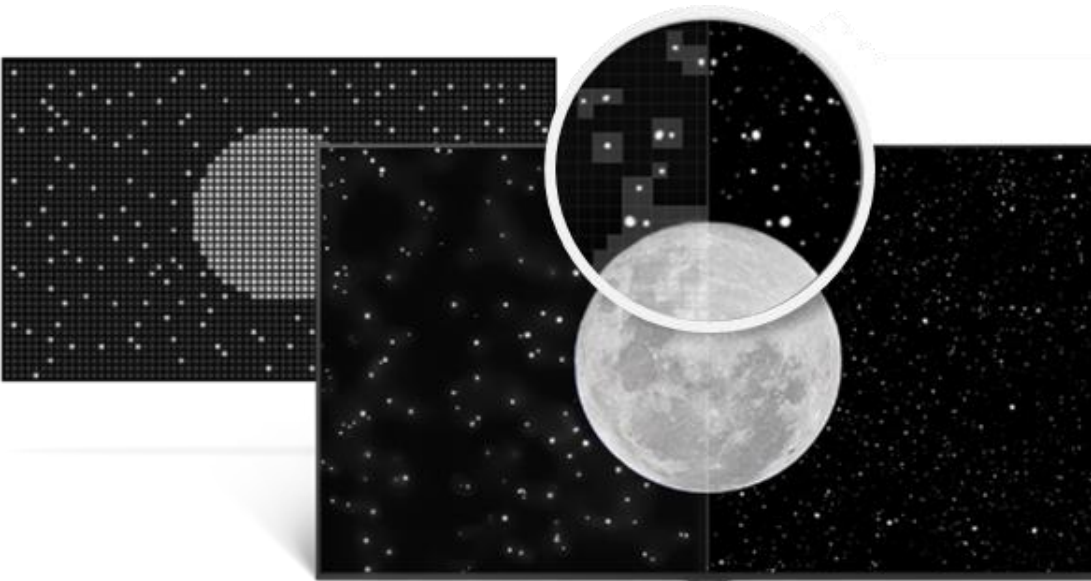

Terms	DCI-P3 (overlap ratio)	Model
Dynamic QNED Color Pro	95%~	115QNED90B, QNED85B, QNED82B, QNED8MB, QNED80B
Dynamic QNED Color	90%	85/75/65/55QNED90B, QNED70B / 7SB

F

Precision Dimming

- As the number of local dimming blocks increases, more sophisticated image expression is possible with LED backlights similar to the original image shape

Number of blocks	Micro RGB evo

Backlight Control Technology for optimized black expression and improved contrast by analyzing image Signals

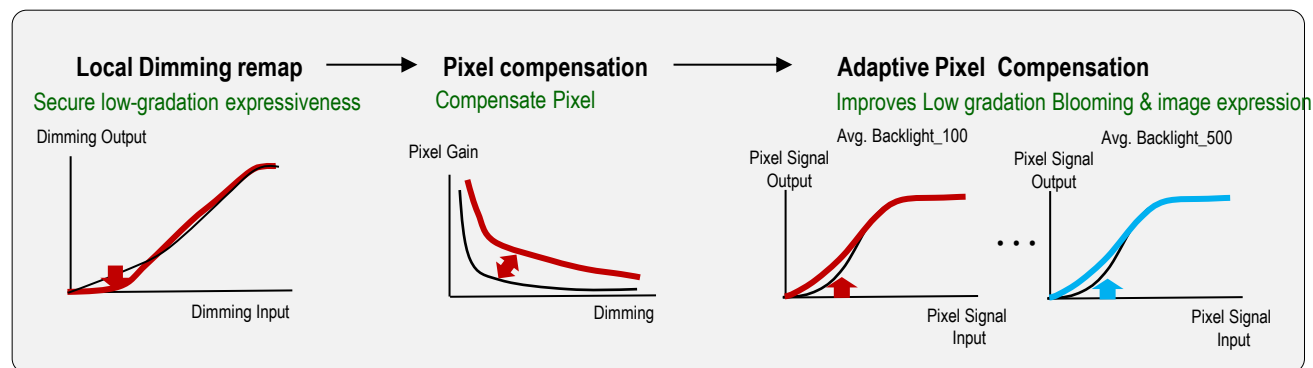

N

AI Local Contrast Enhancer

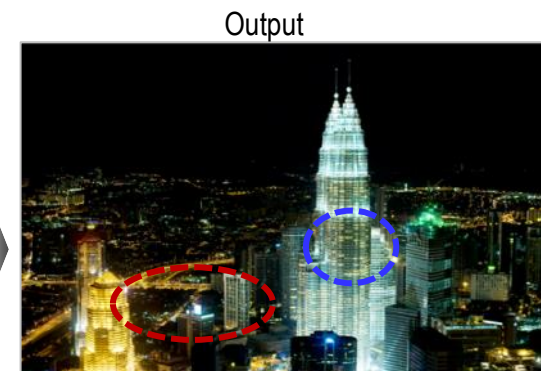

*Apply to : MRGB85B, 115QNED90B, QNED85B, QNED82B, 98NU85 SoC K26

- In order to improve LCD blooming, the image is optimized and controlled by analyzing the backlight signal and then optimizing the brightness adjustment signal to enhance the expressiveness of the image.
- Analyzes the black and signal range and automatically adjusts the backlight to improve local brightness and black expression

① Adaptive Pixel compensation

② enhance brightness for LCD's each block area

True Wireless technology with Lossless Vision deliver a LG's unique & premium experience.

F First U Unique N New

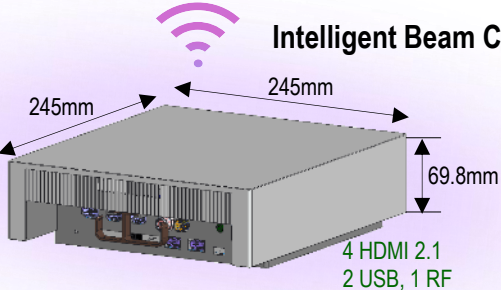

F

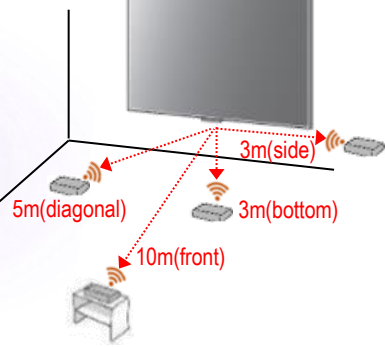

Zero connect Box

*Apply to : MRGB9MB

- The world's first 4K 144Hz wireless transmit TV to reproduce the original enriched Pure RGB color technology also provides a new experience free from space.

Intelligent Beam Control

- Intelligent Beam Control automatically detects and analyzes installation conditions to configure the optimal antenna.

- 38% enhanced obstacle penetration performance up to 3.5inches thick wood cabinet. No wireless disruption from pets, kids or everyday movements like cleaning

- Both G-SYNC (OLED only) and FreeSync certified wireless technology with latency under 4ms and low data compression rate

The Only True wireless experience

*Apply to : OLEDW6 / MRGB9MB

- certified “True Wireless Lossless Vision” for ultra-low latency and visually lossless performance by TÜV Rheinland

- minimizes interference between devices by high frequency and high bandwidth. and provides same picture quality experience as a wired connection over true wireless with low compression and high-speed wireless transmission.

VS.

	MRGB9MB	Others
Bandwidth	60GHz	6GHz
Transfer Rate	15Gbps	300Mbps
Compression Rate	< 6:1	> 50:1
Input lag (wireless @ 4K 120Hz)	< 4ms 	> 15ms 
Interference between devices	No	Vulnerable (possibility for noise and video stuttering)

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

AI Matrix Dimming technology performs AI-based contents analysis frame by frame and applies alpha processor-driven dimming by controlling thousands of image blocks to enhance brightness, contrast, low-gray detail, and clarity in every scene

AI Contents Analysis

*Apply to : MRGB, QNED82B↑, 98NU85

AI analyzes the content of the image and optimizes picture quality for each scene

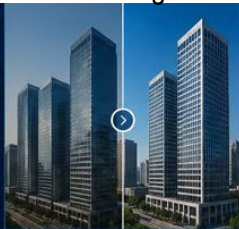

Landscape

Enhance edge texture
And color vividness

✓ Improved edge clarity
✓ Richer and more vivid colors

Building

Emphasize contour
sharpness and detail

✓ Sharper outlines
✓ Improved distinction and
details

Night view

Improved visibility
In dark tones

✓ Enhanced low-level
luminance distinction

Indoor

Standard expression

✓ Natural and balanced
picture quality

Local Contrast Enhancer

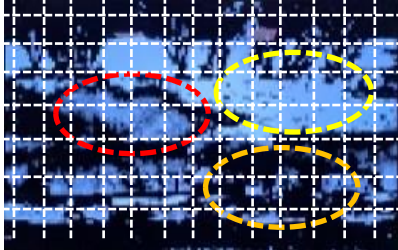

Maximizes the perceived contrast ratio of the image through separate control by dividing the low / middle / high gradation in the image.

Input Image

SDR or HDR10

Local Contrast Enhancer

Output Image

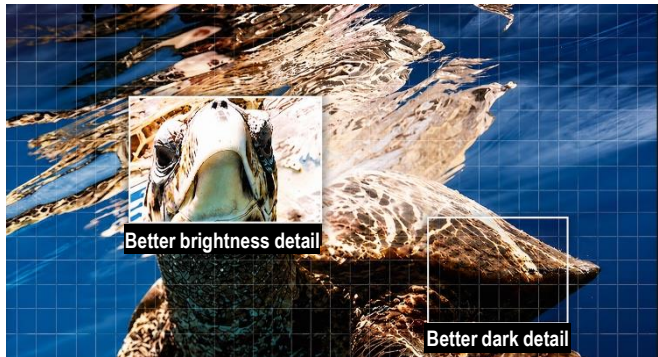

Enhance brightness for each local area by applying optimal tone curve through 5,184*1) image grayscale analysis for each area

*1) α11 (5,184 block), α8 / α7 (2,040 block)

AI Matrix Dimming

✂ AI Matrix Dimming only works when AI Picture Pro is "ON"

Before

- limited control in dark areas
- loss of detail in low-gray levels

After (AI Matrix Dimming)

+ enhanced low-gray level visibility
+ more details, richer expression

UPDATED

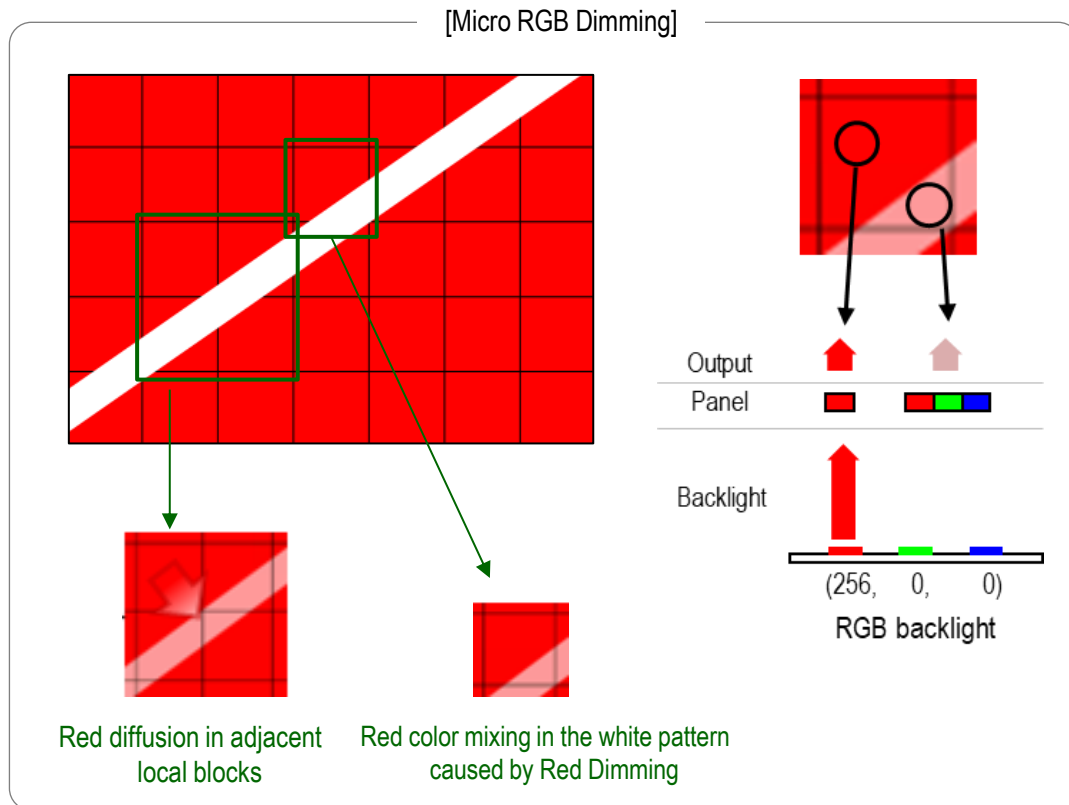

Marketing Terms	Technical Terms	AI Contents Analysis	Local Contrast Enhancer	Model

The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

Precision Color Enhancer analyzes the image and applies optimized dimming for each block to **provide optimal color expression**

What is Color Crosstalk

- **Color distortion** occurs in the white area within a local dimming block due to the backlight color
- **Color mixing** caused by light diffusion from adjacent local blocks

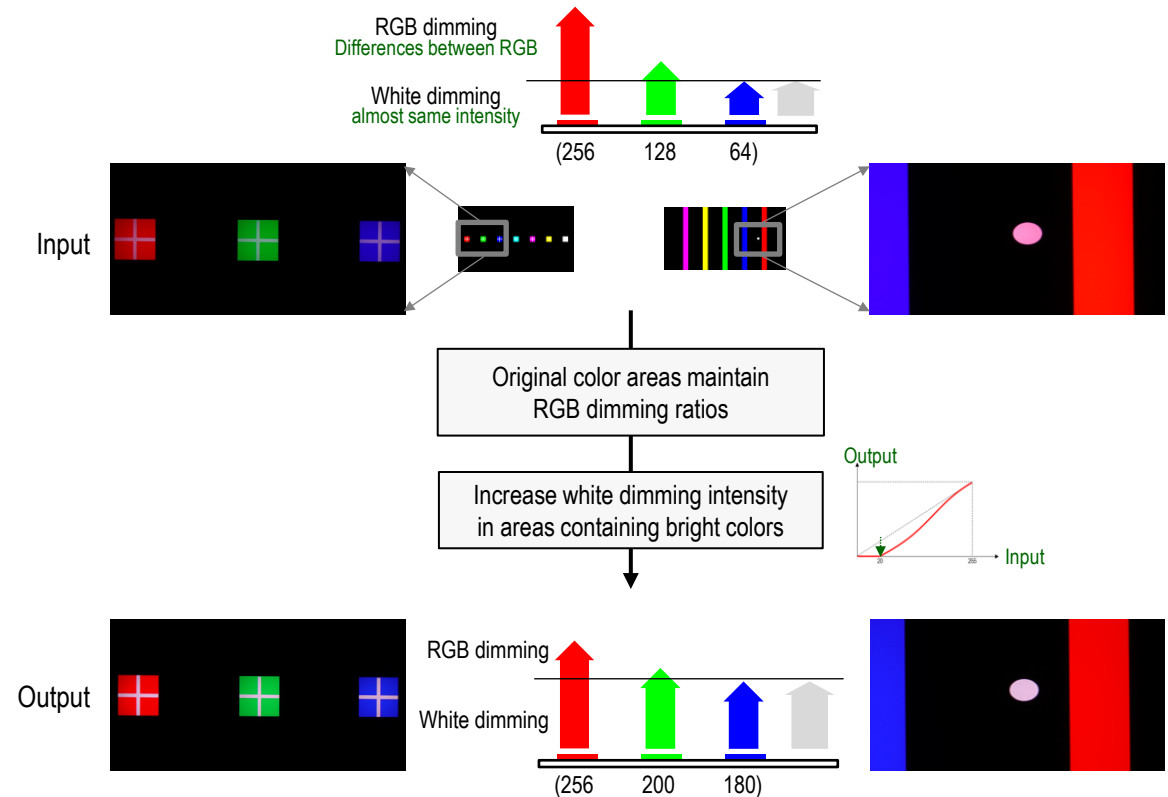

U

Precision Color Enhancer

*Apply to : MRGB95B

- Precision Color Enhancer **detect image signal for each area to improve color expression** and apply optimal LUT(Look-Up Table) curves, the original color areas maintain their RGB dimming ratios, while **white dimming intensity is increased in areas containing bright colors.**

F

U

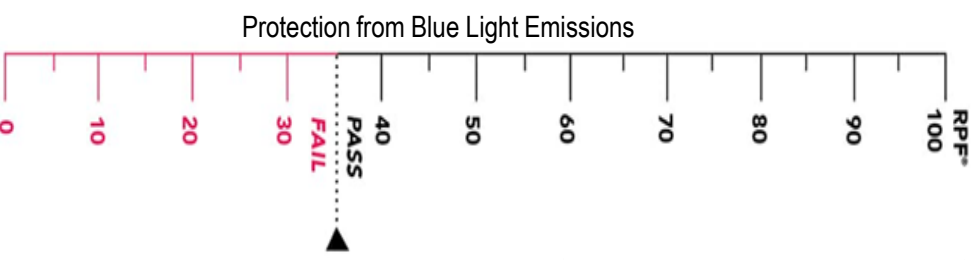

N

LG LCD's blue light reduction technology has been proven to effectively reduce blue light, helping to protect eye health

U

Radiance Protection Factor

- Radiance Protection Factor (RPF) sets the industry standard for blue light protection with a comprehensive scale for evaluating efficacy and communicating value.
- RPF scale measures blue light emissions and potential risk for the eyes. The higher the number, the better — in essence, higher RPF numbers indicate a greater reduction of high-energy blue light
- LG LCD’s product has been verified for compliance with Eyesafe® 3.0 requirements

RPF value > 35

$$RPF = 260 \times \frac{BLTF_{D65} - BLTF_{Tested}}{BLTF_{D65}}$$

• $BLTF_{D65} = 0.098$

• $BLTF_{Tested}$ = The BLTF of the tested sample

* BLTF : Blue Light Toxicity Factor

Blue Light Toxicity Factor (BLTF) corresponds to the ratio of the display's blue light effective radiance over the calculated display's luminance.

The Radiance protection factor (RPF) for display is calculated based on the blue light toxicity factor. Higher RPF numbers indicate greater reduction of toxic high-energy blue light emissions.

Radiance Protection Factor (RPF)	Blue Light Toxicity Factor (BLTF) range
RPF35	$0.085 \geq BLTF > 0.083$
RPF40	$0.083 \geq BLTF > 0.079$
RPF50	$0.079 \geq BLTF > 0.075$
RPF60	$0.075 \geq BLTF > 0.072$
RPF70	$0.072 \geq BLTF > 0.068$
RPF80	$0.068 \geq BLTF > 0.064$
RPF90	$0.064 \geq BLTF > 0.060$
RPF100	$0.060 \geq BLTF$

8. NANO UHD Technology Leadership

4K Super Upscaling / Nano-detail enhancer

F First U Unique N New

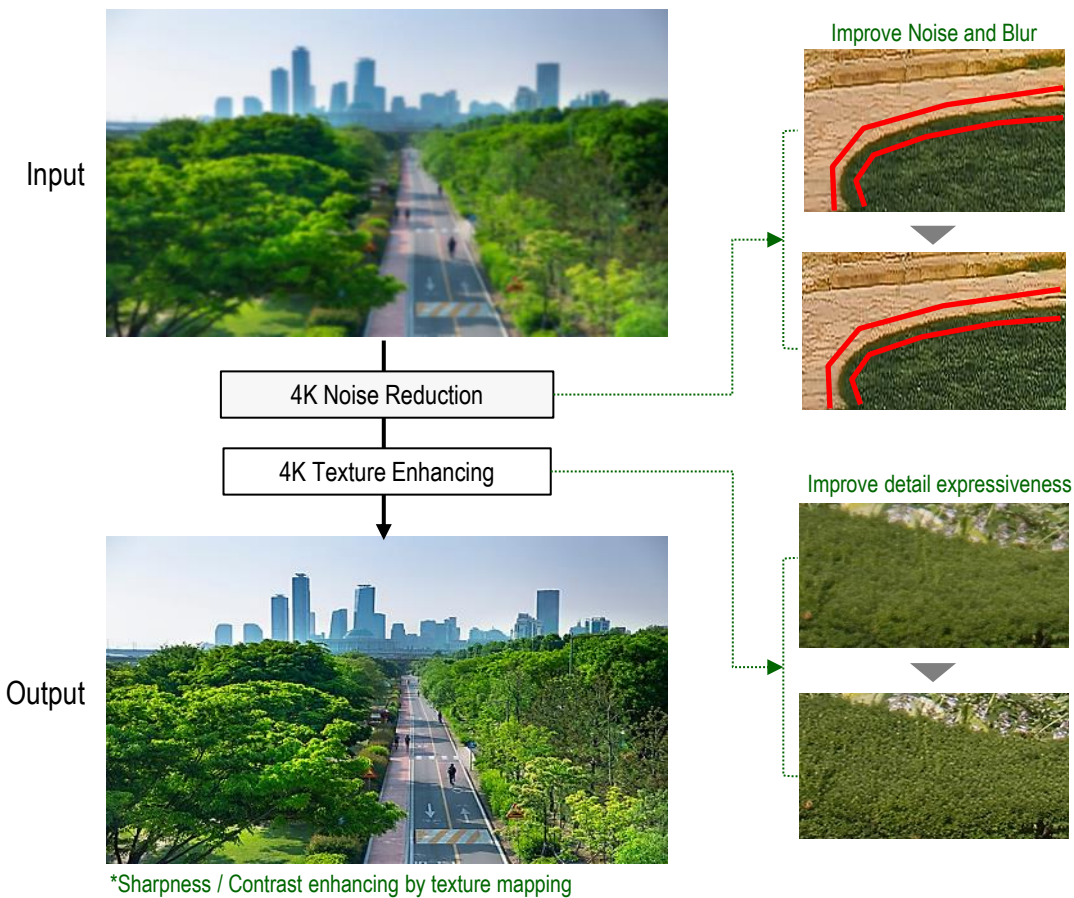

Real 4K image with LG's new Nano-detail enhancer technology powered by a AI Processor

U

4K Super Upscaling

*Apply to : QNED80B/70B/7SB, 85/75/65/55/50/43NU85, NU80

- By recognizing the texture area in the 4K input image, it enhances clarity to express a more detailed image

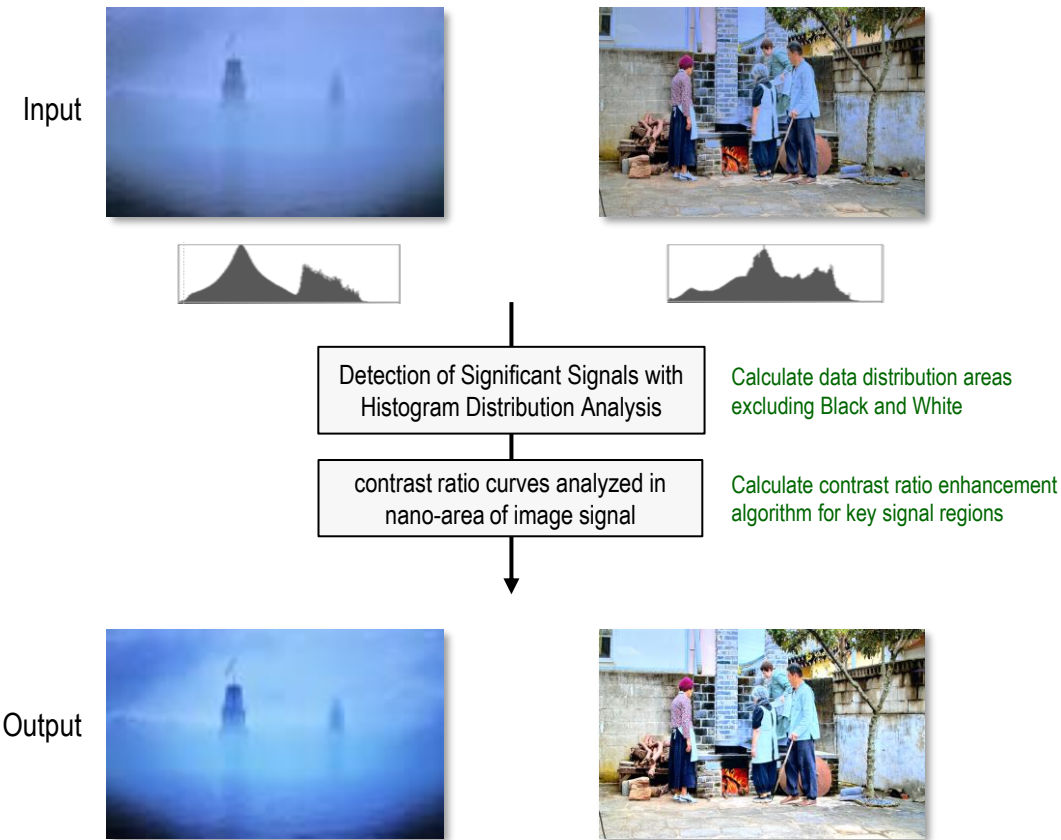

N

Nano-detail enhancer

*Apply to : NU85, NU80

- Nano-detail enhancers detect key signals in images at the nano-area to improve contrast ratio in real images and apply optimal contrast curves. The contrast ratio of objects is emphasized to enhance the three-dimensional effect.

Integrated to your space, Sleek and Fit Experienced

N

'26 New

Linear Flow Design

*Apply to : NU85

- Linear Flow metallic body design, Beautiful in any space

Linear Flow body

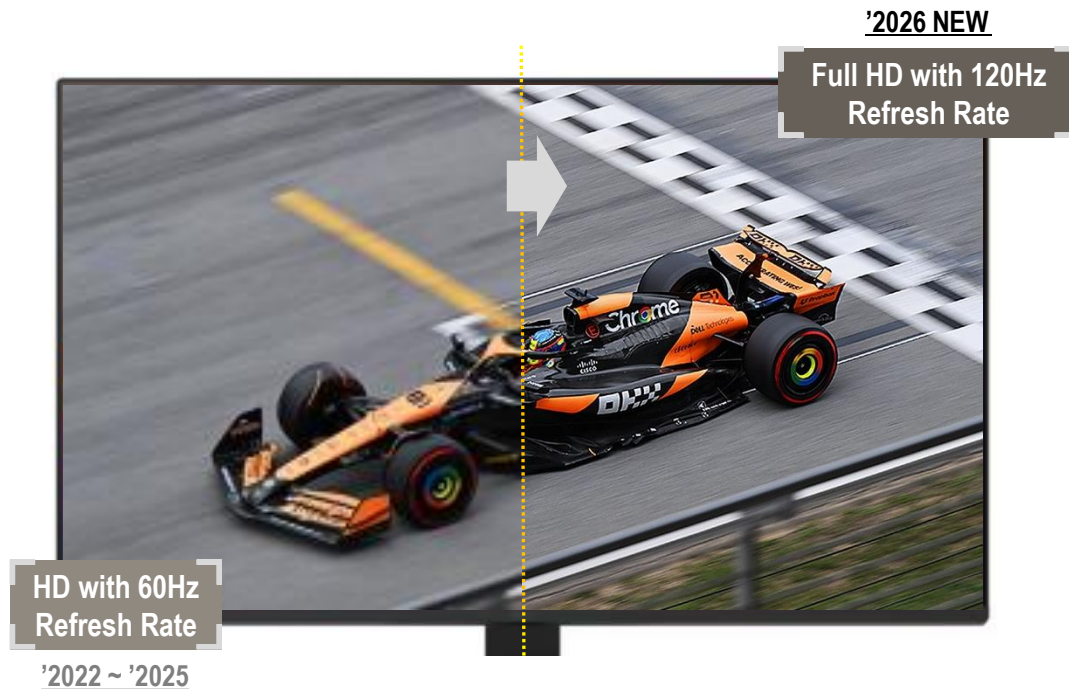

The new Linear Flow-shaped metallic design blends elegantly into any space, providing a truly immersive experience.

Upgraded display performance and refined design for enhanced competitiveness in small-sized TVs

Full HD with 120Hz refresh rate

*Apply to : 27/24LB70

- Upgrade from HD 60Hz to FHD 120Hz for sharper visuals and smooth motion, delivering an immersive experience in both video playback and gaming

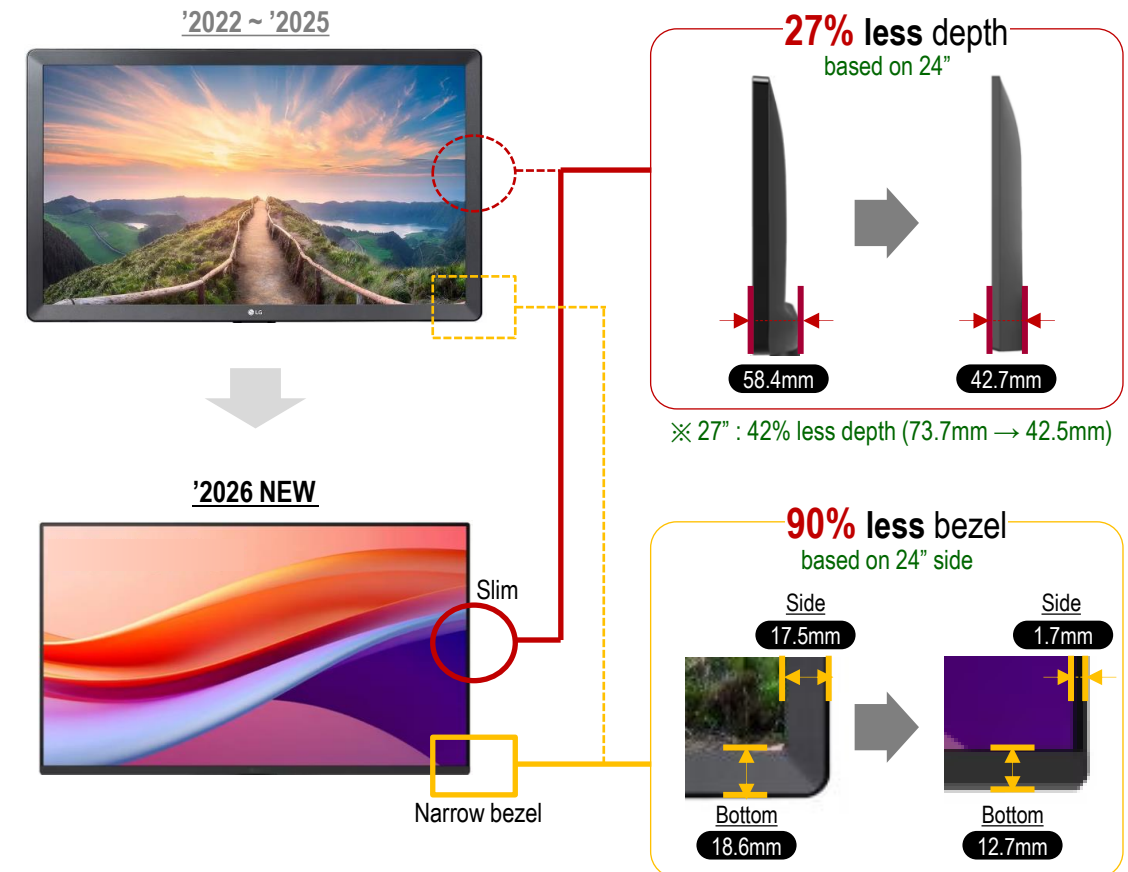

U

Slim & Cinema Design

*Apply to : 27/24LB70

- Slim profile and narrow bezels enhance both style and screen focus

F First U Unique N New

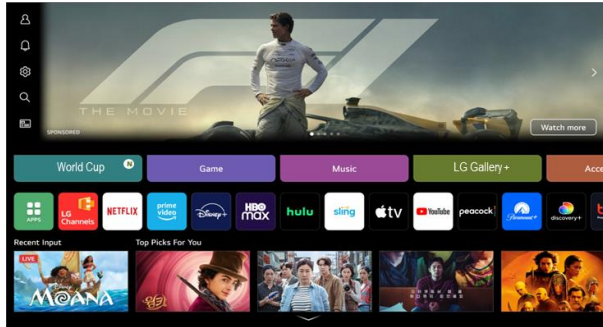

The new webOS platform is now available on FHD models, delivering the latest Smart TV experience

U

webOS26 Home Screen

*Apply to : 27/24LB70

- Upgrade to improve the Personalized Experience

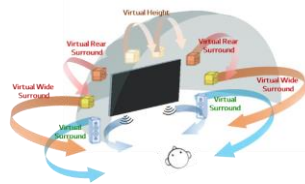

Account login has become mandatory, allowing webOS to provide its own personalized service to more customers

N

Smart TV with built-in AI features

*Apply to : 27/24LB70 (differ by region)

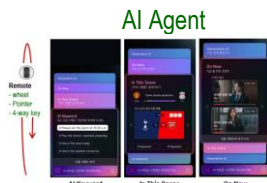

- Equipped with Auto Brightness Control and AI Sound Pro by default

Wider surround sound up to 9.1.2 channels

Virtual Wide Surround (2ch)
+ Virtual Rear Surround (2ch)
+ Virtual Surround (2ch)
+ Front, Center (3ch)
+ Woofer (.1ch) + Virtual Height (..2ch)

- Enhance your LG AI experience even further with the optional LG AI Magic Remote required purchase separately

AI Agent

Proactive AI Recommendation

Multi-AI Search

F

webOS26 Quick Card

*Apply to : 27/24LB70 (differ by region)

- Expanding Q Card services and UX to deliver differentiated experiences tailored to customer usage patterns

Sports

See top sports updates on one screen, customize your favorite leagues, and get alerts

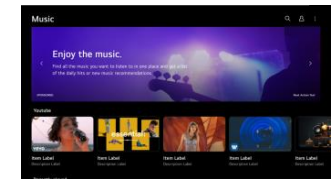

Gaming Portal

Enjoy a wide array of gaming experiences

Music

Enhanced UI for music recommendations

U

Live TV with LG Channels

*Apply to : 27/24LB70 (LG Channel supported Countries)

- To enhance LG Channels service usability by expanding entry points

First Use Setup

Home

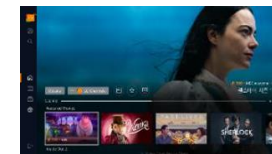

How to enter the LG Channels on the home screen

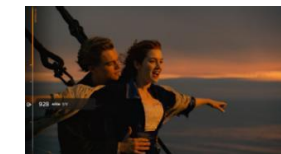

- ① LG Channels Ad. → LG Channels App
- ② App icon → LG Channels App
- ③ LG Channels Live → Live TV App
- ④ LG Channels recommendations → LG Channels App
- ⑤ Input mode → LG Channels App

Provides an optimized 4K image according to the characteristics of the image by analyzing the genre and scene and applying multiple image quality improvement algorithms simultaneously

F First U Unique N New

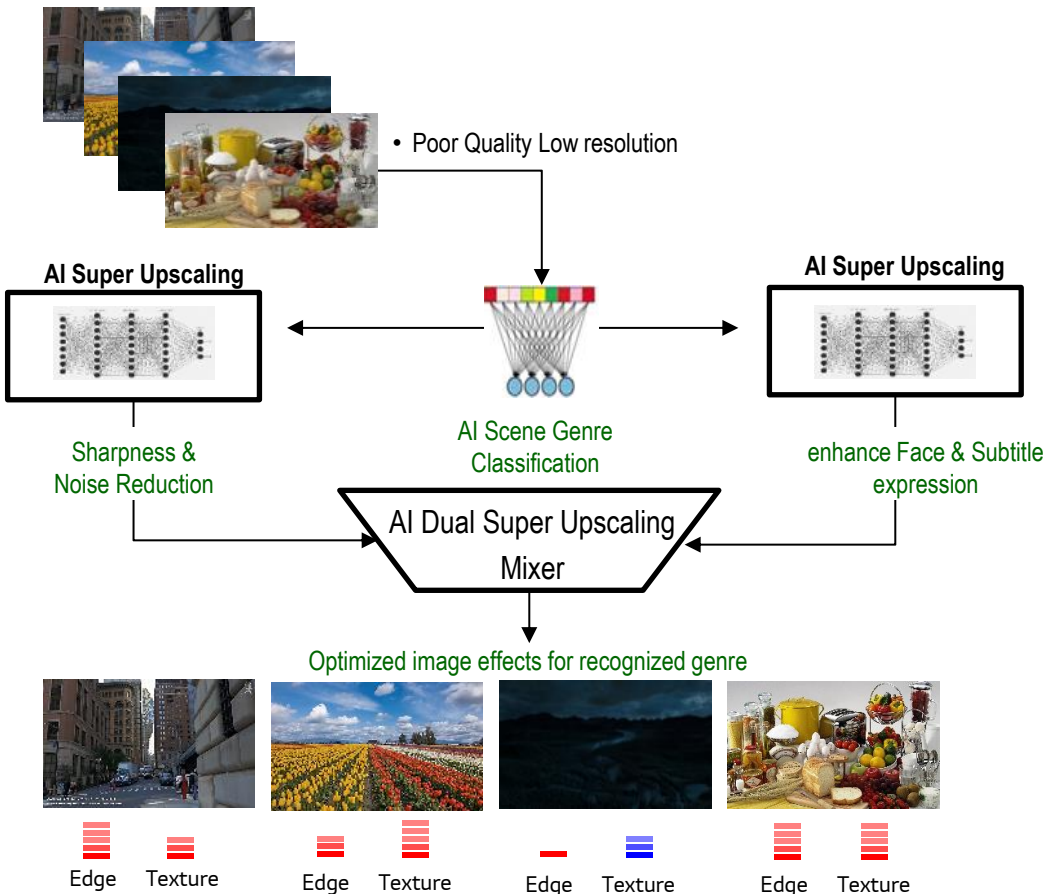

F

AI Dual Super Upscaling

'26 New

*Apply to : W6, G6, C6, MRGB95B, MRGB9MB SoC O26

- The AI scene genre detection results are linked to each dual SR network (edge and texture) to show crisp and clear images optimized for scene characteristics in real time.

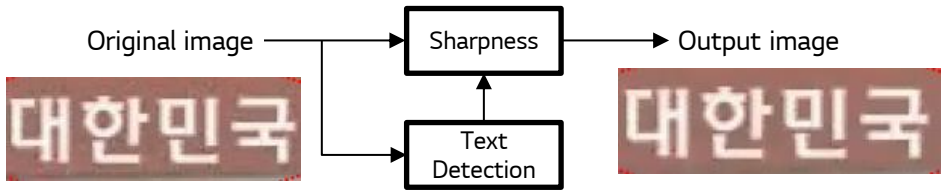

N

Subtitle Clarity Enhancer

*Apply to : W6, G6, C6, MRGB95B, MRGB9MB SoC O26

- Text detection function is added to Sharpness to process the clarity around subtitles separately. In other words, the clarity of the non-subtitle part is maintained as much as possible, and the level of mosquito noise around the subtitle is improved, making the subtitle more visible than before.
- Subtitle noise and clarity improvement algorithm using Text(Subtitle) detection: Improves text readability for home shopping, news, etc.

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

The improved α8 AI Super Upscaling analyzes objects and applies an optimized upscaling for each object to create a more natural 4K images

F First U Unique N New

객체 분석 AI Super Upscaling

SoC K26

- adjusts the upscaling intensity selectively to improve clarity

- Upgrade
- ② green : tree/plant (Intensity ↑)

⑤ face : pink (Intensity ↓)

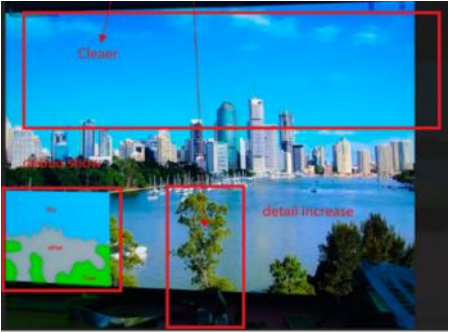

③ blue : water/sea (Intensity ↑)

⑥ cyan : sky (Intensity ↓)

④ yellow : building (Intensity ↑)

⑦ text : purple (Intensity ↓)

analyze objects in the image and selectively adjust the upscaling intensity to improve clarity

Upgrade

U

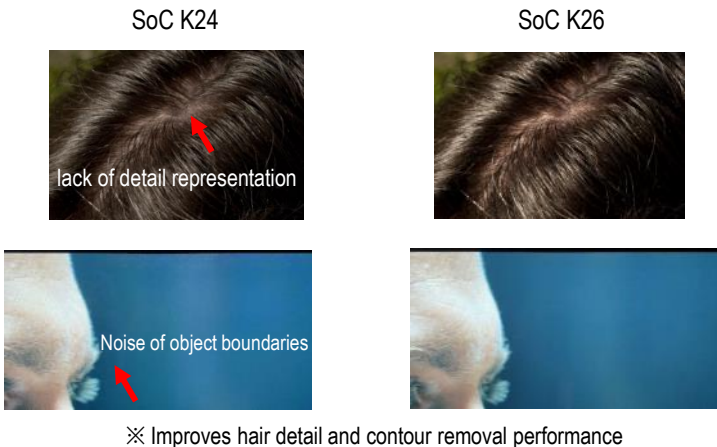

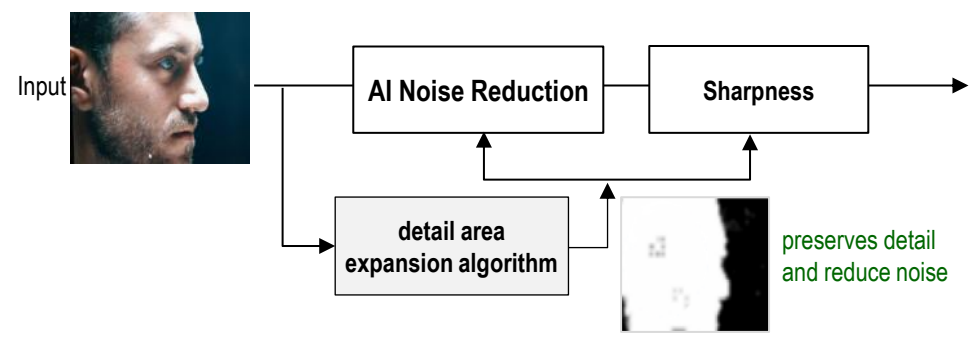

AI Noise Reduction

*Apply to : B6, B6E, MRGB85B, 115QNED90B, QNED85B, QNED82B, 98NU85

Detail을 살리는 Noise reduction

SoC K26

- enhances the noise and clarity of low-quality images
- improves low-quality images by enhancing small detail distinction and contour removal performance of object boundaries simultaneously

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

Preserves the creative intent by detecting intentional film grain noise and leaving that in while removing other noise

What is Grain effect

- **Film grain** is a phenomenon in which fine particles spread in an irregular pattern on the screen, and occurs mainly when the particles of the main photosensitive material used in chemical films do not receive enough light. It was the noise that often **appeared in dark images in the old days of analog filmmaking.**

Grain Effect (Original)

Too much noise reduction

- With the development of cinematography and digital filmmaking, grain images no longer appear as they used to, **but some filmmakers intentionally insert grain noise to give their films an emotional feel**

Harry potter and Deathly Hallow

007 Skyfall

Walking dead

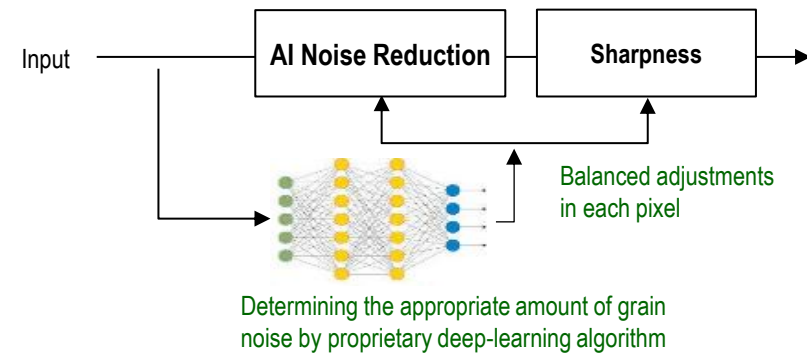

U

AI Noise Reduction

*Apply to : OLED, MRGB, QNED90B, QNED85B, QNED82B, QNED8MB, 98NU85 SoC Q26 / K26 / K24

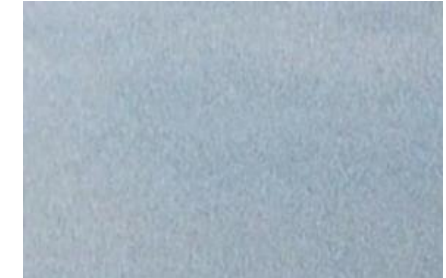

- **Precisely detects grain noise** and **adjusts the level of sharpness** and noise of scene using deep learning neural engine

Unintended amount of grain noise

The amount of grain noise is preserved as the original author intended

F First U Unique N New

Analyzes content and applies optimized HDR Tone mapping to provide optimal HDR effect

N

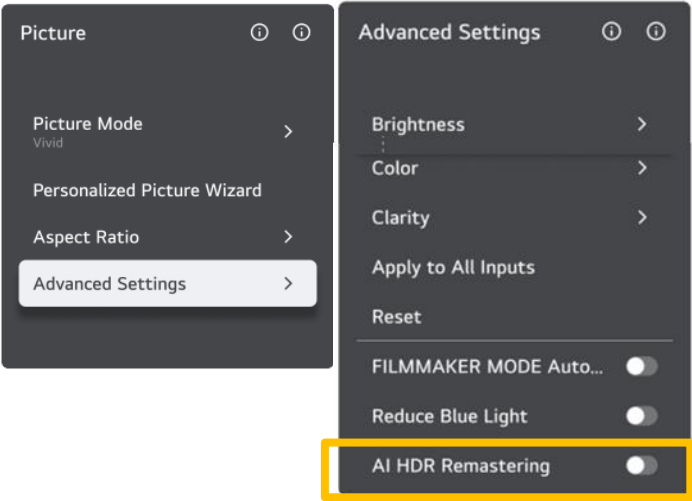

AI HDR Remastering

26 New

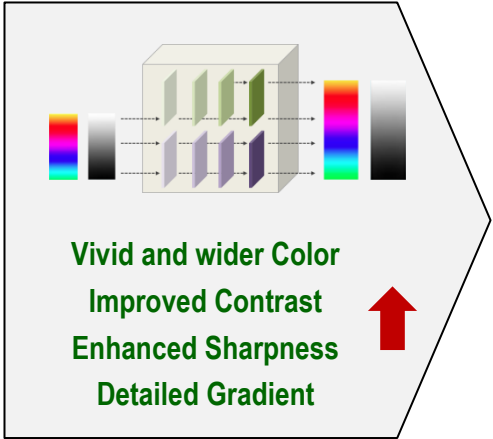

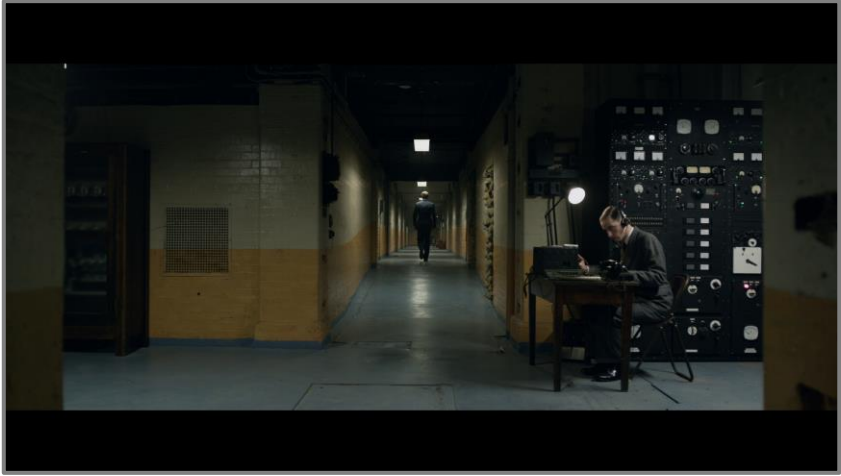

*Apply to : OLED, MRGB, 115QNED90B, QNED85B/82B/80B/70B/7SB, NU85/80 SoC O26 / K26 / K25Lp

- AI HDR Remastering transforms the color, brightness, and contrast of SDR content into a sharper, richer, HDR-like viewing experience
 - SDR content has a limited range of colors and brightness, while HDR offers a wider range, resulting in richer, more realistic visuals.
- AI HDR Remastering analyzes content with AI and automatically optimize color, brightness, and contrast for HDR levels in each scene. provides a more immersive viewing experience even though the original content is not made in HDR

access Setting > picture > Advanced Setting to activate AI HDR Remastering

SDR Content

HDR like Content

* SDR Content Share : 75% (Based on North American Content Market in 2023)

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

F First U Unique N New

Based on genre information, TruMotion's Judder / Dejudder level is automatically adjusted to match the content genre

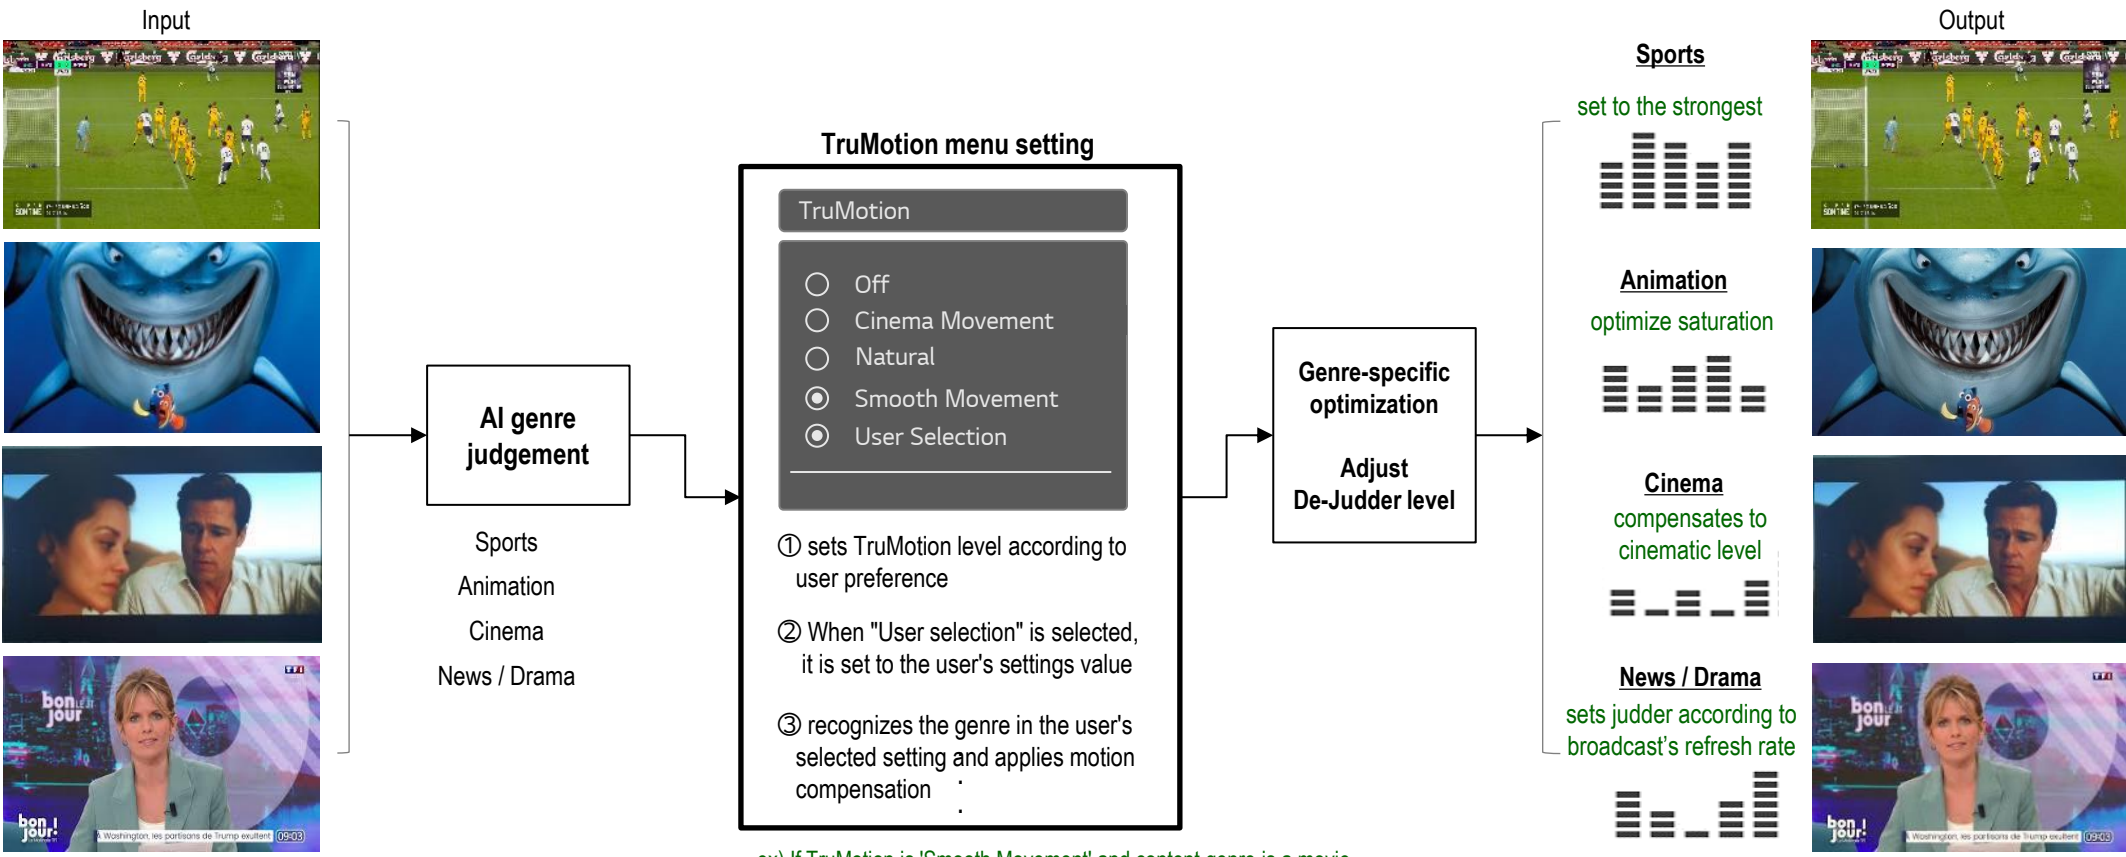

N

'26 New

Genre TruMotion

*Apply to : OLED, MRGB, 115QNED90B, QNED85B/82B/80B/70B/7SB, NU85/80 SoC O26 / K26 / K25Lp

- sets Judder automatically according to the genre by recognizing AI genre information

ex) If TruMotion is 'Smooth Movement' and content genre is a movie, it is applied from "Smooth Movement" to De-judder '-5' level

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

F First U Unique N New

HDR Tone mapping technology analyzes the image and applies **optimized HDR tone mapping** to provide the optimal HDR effect

Dynamic Tone Mapping Ultra : AI Multi Peak Dynamic Tone Mapping + HDR Expression Enhancer + Local Contrast Enhancer
Dynamic Tone Mapping Pro : Multi Peak Dynamic Tone Mapping + Local Contrast Enhancer

N

AI Multi Peak Dynamic Tone Mapping
*26 New
SoC O26 : AI Multi Peak Dynamic Tone Mapping
SoC K26 : Multi Peak Dynamic Tone Mapping
*Apply to : OLED, MRGB, 115QNED90B, QNED85B, QNED82B, 98NU85

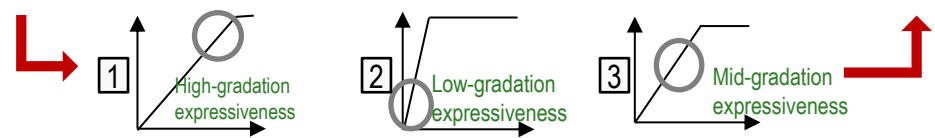

- Apply **Multil peak dynamic tone mapping** curves to improve over saturated high grayscale tone image and brightness of mid and low grayscale tone image

Tone mapping is set based on a peak1 (single peak), resulting in partial saturation of the 2 peak areas

Setting up tone mapping with reference to improve partial saturation of Peak1, Peak2 and Peak 3 regions

U

HDR Expression Enhancer
*Apply to : W6, G6, C6, MRGB95B, MRGB9MB SoC O26

- It is an **HDR enhancement technology** that improves three-dimensional effect, sharpness, and expressiveness **by applying individual tone mapping curves optimized for objects and areas**

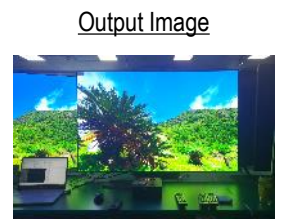

HDR10 / HLG / Dolby Vision

Quad Maps Analysis

Body	Head
Depth	Detail
*Deep Learning Analysis	
Local Contrast Enhancer for 5,184 blocks	

Final Tone mapping curve

Improve three-dimensional effect, sharpness, and expressiveness

U

Local Contrast Enhancer
SoC O26 / K26 / K24 / K25Lp

- Maximizes the perceived contrast ratio of the image through separate control by dividing the low / middle / high gradation in the image.

Dynamic Tone Mapping

Enhance global color & contrast through frame by frame signal processing in RGB area

Local Contrast Enhancer

Enhance brightness for each local area by applying optimal tone curve through 5,184*1 image grayscale analysis for each area

* a11 (5,184 block), a8 / a7 (2,040 block)

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

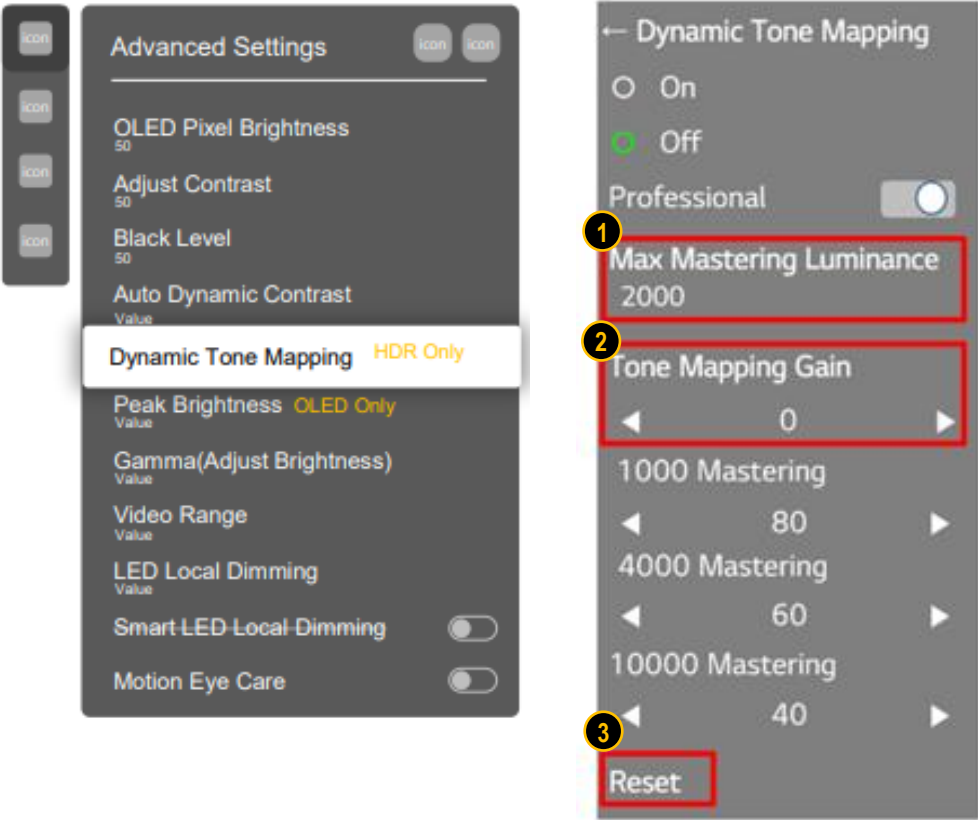

Provides experts the option to adjust the expression of high grayscales within the Tone map

U

Dynamic Tone Mapping Professional

*Apply to all 2026 TVs

- Provides options to control high-gradient expression of HDR10 images, replacing some of the Reference Monitor features for professional producers

- 1 Displays mastering information for the currently playing content (range :0 ~ 10000)
- 2 Set the change value for the currently applied Tone Curve slope (Change value : -5 ~ +5, 11 step)
- : -% luminance value Tone Mapping slope (slope up)
0 : module luminance spec Tone Mapping slope
+ : +% luminance value Tone Mapping slope (slope down)
- 3 Set initial value when selecting "Reset"

Provides outstanding lifelike image quality while also enhancing AI object enhancing effect

While AI Picture pro being processed, It also recognizes faces, bodies and object area, that viewers are primarily interested in, to express the characters on the screen clearly and cleanly, the noise artifacts around the characters being removed and enhancing the three-dimensional expressiveness

U

People / Body / Depth enhancing

*Apply to : OLED, MRGB, QNED90B, QNED85B, QNED82B, QNED8MB, 98NU85 SoC O26 / K26 / K24

- Detects face, bodies to apply a sharp image quality as compared to the background

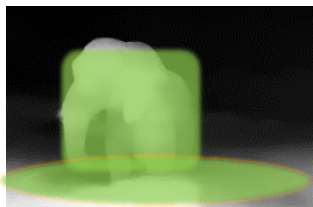

Face
Enhancing
(α_{11} , α_9 , α_8)

Bodies
(α_{11} , α_9 , α_8)

Fore-back Depth
(α_{11} , α_9 , α_8)

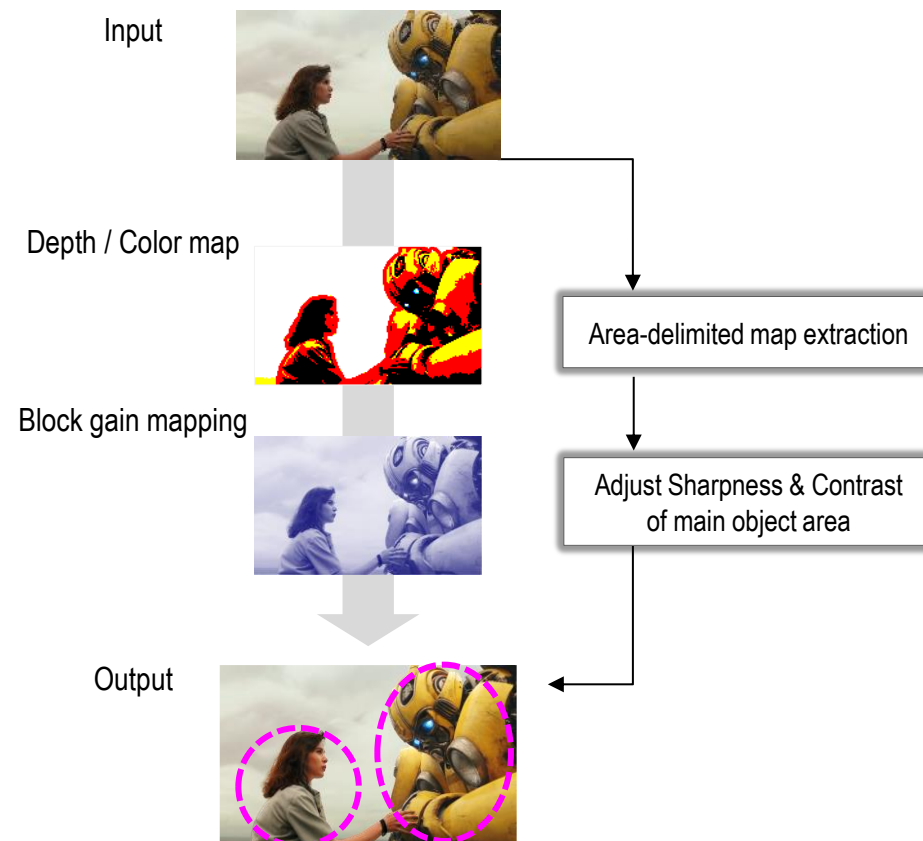

U

Perceived object enhancing

*Apply to : W6, G6, C6, MRGB95B, MRGB9MB SoC O26

- Maximizes the depth of field with ANY object that viewer's might be interested in.

F First

U Unique

N New

AI Sound Pro provides even wider, clearer and more balanced sound

U

AI Surround Sound

- With the α processor and deep-learning sound technology, 2026 LG TVs provide even wider surround sound up to 11.1.2 channels.

Virtual 11.1.2 Ch. added ambient sound

Virtual Ambient Surround (11.1.2ch)
+ Virtual Wide Surround (2ch)
+ Virtual Rear Surround (2ch)
+ Virtual Surround (2ch) + (2ch)
+ Front, Center (3ch)
+ Woofer (.1ch) + Virtual Height (..2ch)

Virtual 11.1.2 SoC O26 / K26	OLED, MRGB, 115QNED90B, QNED85B, QNED82B, 98NU85
Virtual 9.1.2 SoC K24 / K25Lp / LM24F	85/75/65/55QNED90B, QNED8MB, QNED80B, QNED70B, QNED7SB 85/75/65/55/50/43NU85, NU80, LB70, LB65

U

Clear Sound

*Apply to : α 11 / α 8 / α 7 / α 5 AI Processor

- By correcting sound tone and clear outline of the sound source, the sound clarity is more improved again so that sound appears as if it is coming from the front

The sound of the conventional
Down-firing speaker.

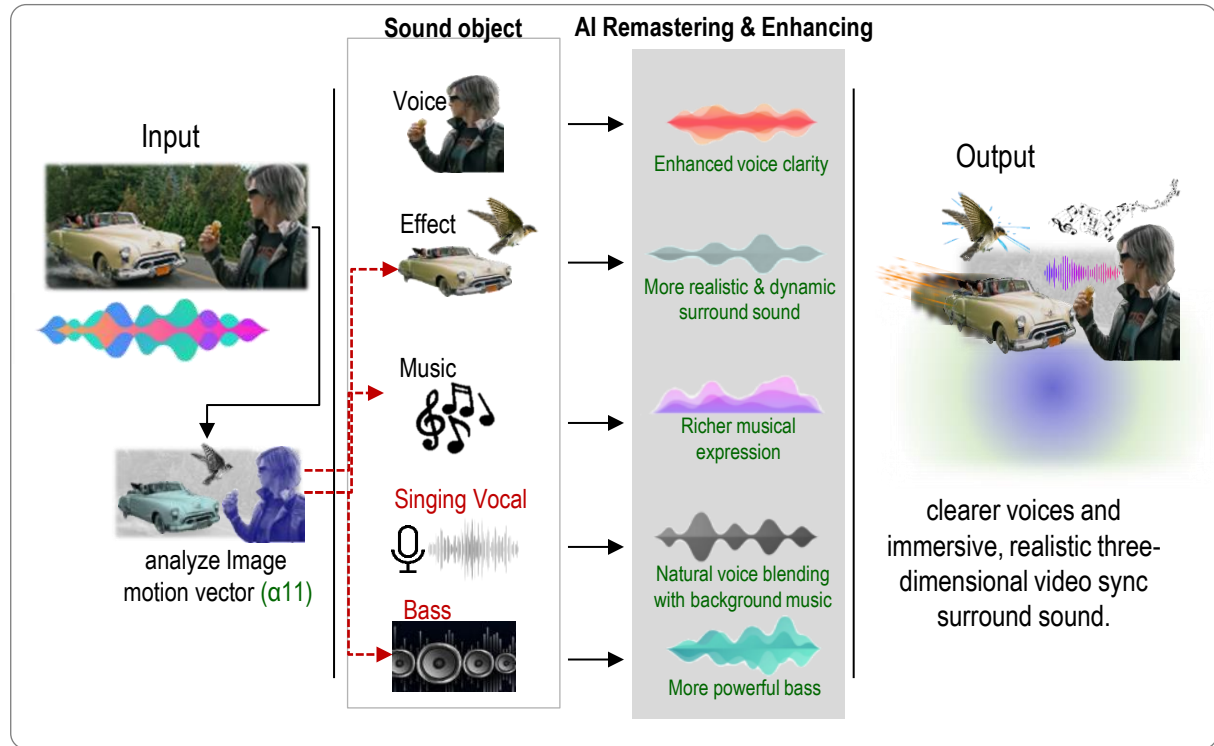

The sound matches the picture better and sounds clearer.

N

AI Object Remastering Ultra

*Apply to : OLED, MRGB, 115QNED90B, QNED85B, QNED82B, 98NU85
SoC O26 / K26

- AI Object Remastering is extracting and separating the voice, sound effects, music, singing vocal and bass from the source audio tracks, and remastering them to produce clear and immersive sound and provide realistic & dynamic sound for each scene through the video sync surround.

Processor	Terms of remastering	Sound object Upgrade
α 11 AI Processor Gen3	AI Object Remastering Ultra	5ea (Voice, Effect, Music + New Singing Vocal, Bass) + Video Sync Surround
α 8 AI Processor Gen3	AI Object Remastering Pro	3ea (Voice, Effect, Music)

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Filmmaker mode is the picture mode on supported TVs preserves the director’s creative intent and provides a cinematic experience.

F First U Unique N New

U

Filmmaker mode

Filmmakers, Hollywood studios, consumer electronics companies and the UHD Alliance have collaborated to make this next-level home theater viewing experience possible. By disabling all post-processing (e.g. motion smoothing) and preserving the correct aspect ratios, colors and frame rates, Filmmaker Mode enables your TV to display the movie or television show’s content precisely as it was intended by the filmmaker

“Filmmaker mode is particularly important when you see classic films at home rather than movie theatre”

“Filmmaker mode display movies and TV shows as they were intended by the filmmaker”.

“For those of you who choose to experience the film at home, I recommend watching Dune in Filmmaker Mode”.

U

Ambient Light Compensation

* Apply to : 2026 OLED / MRGB / QNED TVs except 85/75/65/55QNED90B, QNED7SB

Film maker’s environment

Home environment

Same quality with ambient light compensation

Filmmakers master their movies in an environment where ambient light completely blocked out, however General customers cannot properly appreciate the quality of the filmmaker mode because of an environment with various ambient lights, such as outside sunlight and indoor lighting. The filmmaker ambient light mode automatically adjusts the brightness and colors that accurately detect ambient light and optimizes the level, allowing the customer to enjoy the exact picture quality which intended by filmmakers in any environment

- Filmmaker mode with Dolby vision is supported

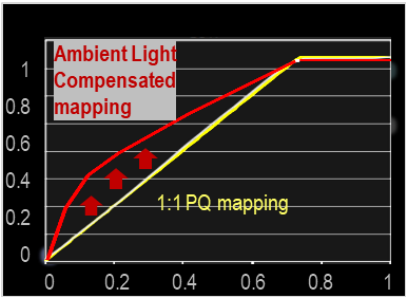

- Filmmaker mode auto starting on AppleTV+ and Amazon prime video app.

Brightness

- Auto Dynamic Contrast
- Off
- Peak Brightness
- Off
- Gamma
- BT.1886
- Filmmaker Ambient Light
- Off

You can change the default value in the brightness menu

F First U Unique N New

Go inside your entertainment with Dolby Vision and Dolby Atmos

U

Dolby Vision

*Apply to : OLED, MRGB, QNED90B, QNED85B

With **ultra vivid colors, sharper contrasts**, and richer details, Dolby Vision gives you fascinating picture quality. **From movies and gaming to streaming at home**, Dolby Vision HDR technology revolutionizes your entertainment with breathtaking, realistic visuals in your LG TVs

U

Dolby Atmos

*Apply to : OLED, MRGB, QNED90B

Dolby Atmos goes beyond the ordinary listening experience and puts you inside the content in a new spatial way, **revealing every detail of the music and sound with unparalleled clarity and depth**

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. F First U Unique N New

Dolby Atmos Flex Connect (DAFC) enables a new Dolby Atmos experience with TV and wireless speakers, allowing **flexible wireless speaker placement with intelligent Dolby Atmos** optimization - regardless of TV and speaker setup.

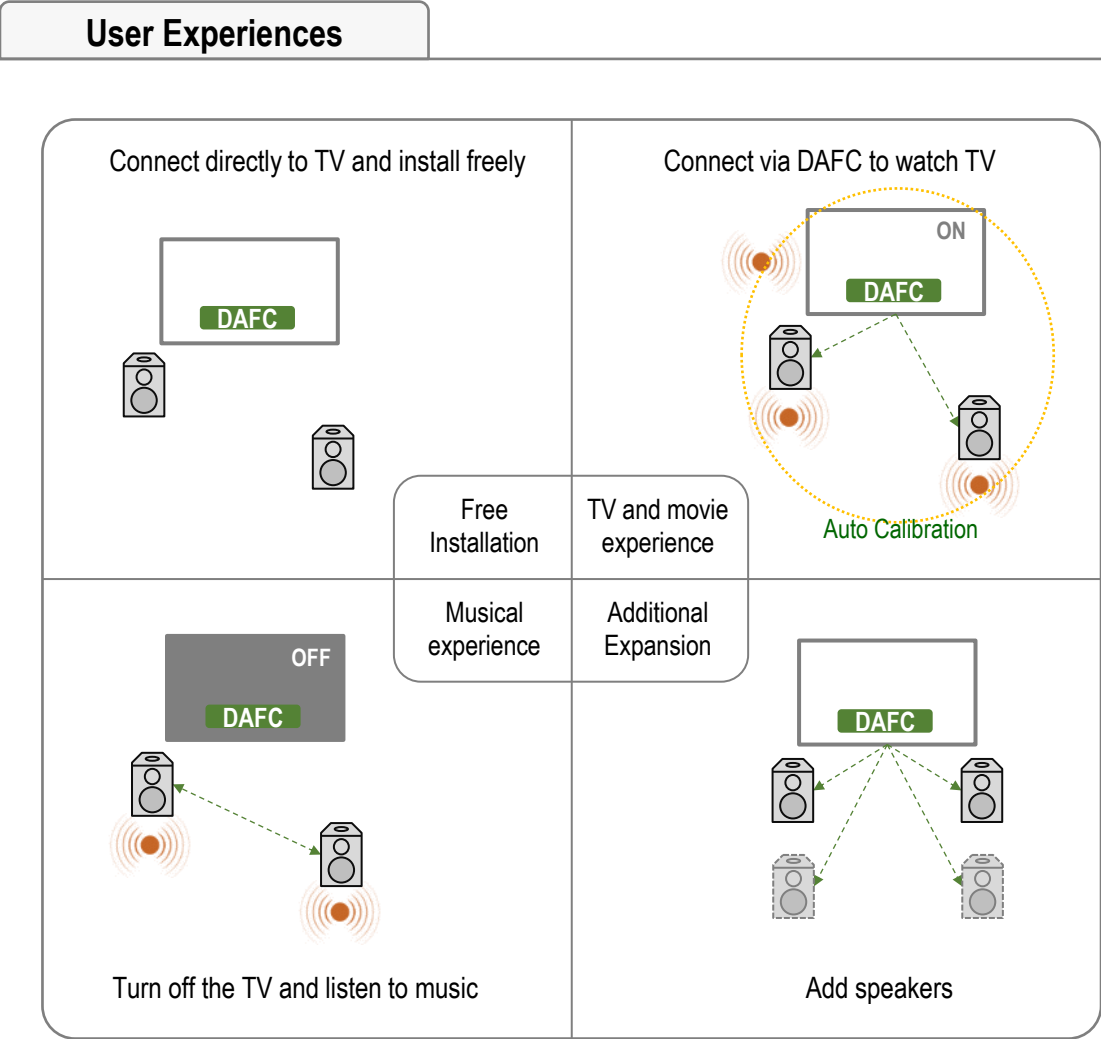

U

Dolby Atmos Flex Connect

*Apply to : OLED, MRGB, 115QNED90B

※ In some countries where Dolby Atmos is available on the QNED85B, DAFC is supported.

- **Speaker position detection**
 - Automatically detects speaker positions using wireless protocol between LG TV and LG audio which DAFC support
- **Acoustic adjustment & Virtualization**
 - Optimize and virtualizes audio based on detected speaker locations and room characteristics, creating immersive sound even from positions where no physical speakers exist.
- **Wireless audio signal transmission**
 - Delivers multi-channel, lossless, high-quality audio signals to speakers using Wi-Fi based wireless transmission technology

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

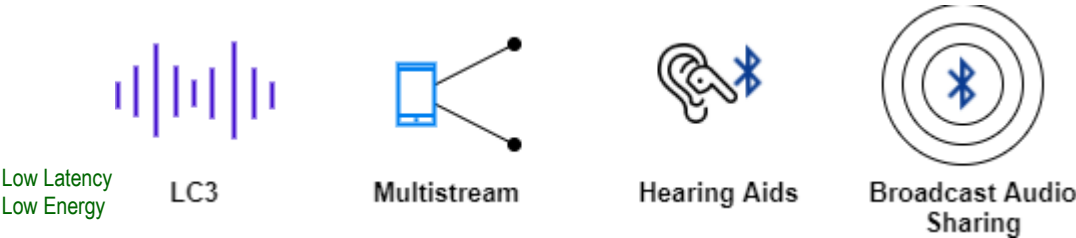

F First U Unique N New

Enhances the performance of Bluetooth audio, adds support for hearing aids, and introduces AURACAST™ broadcast audios.

U

LE Audio

As the names suggest, Classic Audio operates on the Bluetooth Classic radio while LE Audio operates on the Bluetooth Low Energy radio. LE Audio not only supports development of the same audio products and use cases as Classic Audio, it introduces exciting new features that promise to improve their performance and enable the creation of new products and use cases.

- let you invite others to share in your audio experience,
- enable you to fully enjoy televisions in public spaces,
- allow you to hear your best in the places wherever you go

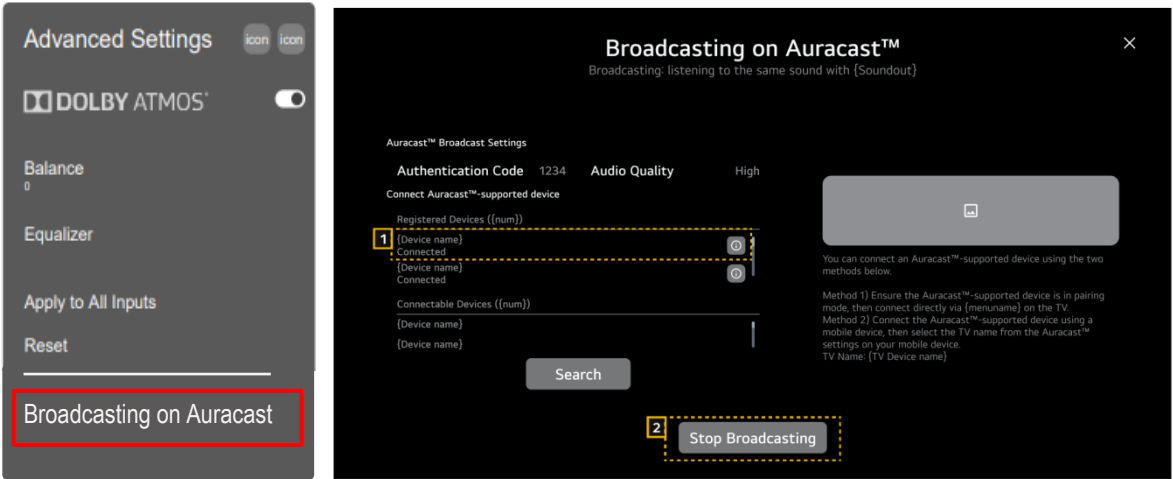

U

AURACAST™

(above 2GB DDR memory & SoC O26, K26, K24, K25Lp)
* Apply to : 2026 OLED, MRGB, QNED90B/85B/82B/80B/70B, 98NU85 TVs

AURACAST™ is a new brand with audio broadcasting capabilities based on Bluetooth technology-a new Bluetooth® feature that offers new audio experience. It enables low-energy audio broadcasting to multiple devices at once, making shared listening simple, power-efficient, and accessible for everyone. While previous TVs required the Mobile Assistant for connection, LG TVs allow direct device connection without it.

- 1 “Find and connect to Auracast -supported device “
- 2 “ Activate / deactivate streaming through start / stop broadcasting button”

*The authentication code is required when using the Mobile Assistant.

12. Gaming Experience

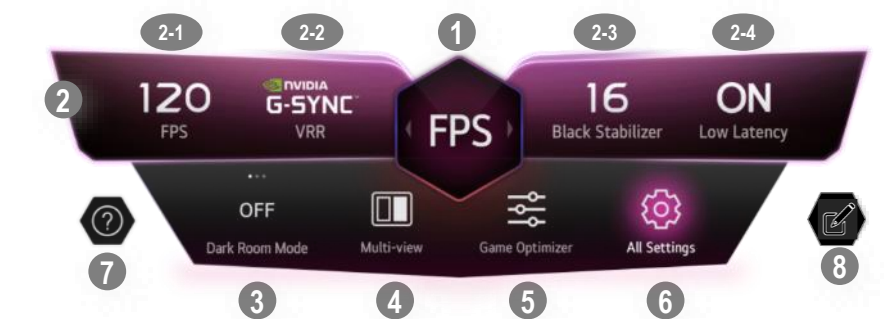

Provides a "Game Dashboard" to view and change the current game settings as you prefer, whether playing console games or cloud games F First U Unique N New

F

Game Dashboard

* Apply to : 2026 OLED / MRGB / QNED / NANO UHD TVs

for Console game (HDMI Input)

- ※ "Game Dashboard" is activated only when both "Game Optimizer" and "Game Dashboard" is "ON"
- ※ Game Console automatically detected (PS, Xbox, Nintendo Switch, Nvidia Shield)
- Nvidia graphics device detection : RTX graphics card

NEW for Cloud game (available after MR2)

- ※ "Cloud Gaming Dashboard" is activated only when a cloud game is currently running.
(When a cloud game is running, it can be activated using the remote control's option key.)
- ※ Cloud game app automatically detected
(Xbox cloud gaming, GeForce Now, Amazon Luna, Blacknut cloud gaming)

1	Game Genre	- Shows the current game genre (Standard, FPS, RPG, RTS, Sports) - "Game Genre" is toggled when the remote control Left/Right key is applied while the "Game Genre" area is focused
2	Current Status	- Shows the current optimizer settings 1) Console game (HDMI Input) (2-1) FPS : Shows the real-time refresh rate (2-2) When VRR is supported : "FreeSync Premium", "G-SYNC", "ON", "OFF" When VRR is not supported : AI Game Sound "ON" or "OFF" (2-3) Black Stabilizer : Shows the corresponding value (2-4) Low Latency : "ON"(when FRC delay is none) or 'OFF" 2) Cloud game - Reduce Blue Light, Game Contrast, Black Stabilizer, White Stabilizer
3	Dark Room Mode	Toggle the "OK" key to change in the order of "Off" → "Lv.1" → "Lv.2"
4	"Multi View" or "Menu Color"	- Multi View : Execute Multi view function when Multi view is supported - Menu Color : Provides menu color (Violet, Orange, Green) change function when Multi view is not supported
5	Game Optimizer	Moves to the "Game Optimizer" settings menu
6	All Settings	Moves to "All Settings" menu
7	User Guide	Moves to the "Game Dashboard" user manual
8	Edit Game Dashboard	Customize your own Game dashboard by changing or switching to different items
9	LG Gaming Portal	Launch the LG Gaming Portal App
10	Gamepad	Moves to the external device connection menu in the system options.

12. Gaming Experience

Motion Booster

F First U Unique N New

Motion Booster for fast, smooth and seamless gaming without tearing and blurring

N

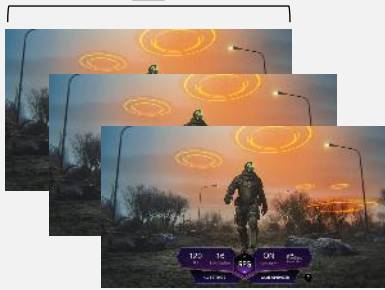

Motion Booster

'26 New

- With the goal of reducing motion blur and improving overall visual smoothness, Motion Booster automatically analyzes the refresh rate of game content and boosts it faster to help win across a wide range of genres, especially in fast-moving games where you're racing against the clock
- In particular, it supports VRR to minimize tearing and blurring on fast-moving games, improving the viewing experience

Terms	Model
Motion Booster 330	MRGB95B, 115QNED90B
Motion Booster 288	MRGB85B, QNED85B, QNED82B, 98NU85
Motion Booster 120	85/75/65/50/43QNED80B

Clear, smooth images with “G-SYNC compatible” and “AMD FreeSync Premium” with 144Hz Mode

U

Certified VRR

- Tearing, stuttering and slow input lag

- Tear-free, stutter-free and lowest input lag with certified VRR

- G-Sync compatible TVs: W6, G6, C6, B6, B6E
- FreeSync Premium TVs: W6, G6, C6, B6, B6E, MRGB95B, MRGB9MB, MRGB85B, QNED90B, QNED85B, QNED82B, QNED8MB
- ※ Only RTX 40/ 30/ 20 –series and GTX 16-series GPUs will support G-SYNC compatible with LG OLED TVs
- ※ W6, 83/77/65/55/48G6, C6, MRGB95B, 115QNED90B : Supports 165Hz with compatible PC-connected content
- ※ B6, MRGB9MB, MRGB85B, 85/75/65/55QNED90B, QNED85B, QNED82B, QNED8MB : Supports 144Hz with compatible PC-connected content

U

165 / 144Hz Mode

- The higher Frequency, the smoother the movement. The **LG OLED TV can express up to 165 frames per second**. It reduces the "sickness" that game users may feel as they move their eyes quickly, and further improves image stuttering issue when an enemy suddenly appears in a corner or when a weapon is wielded in a continuous motion

[60Hz gaming]

[165Hz gaming]

* 165Hz VRR : W6, 83/77/65/55/48G6, C6, MRGB95B, 115QNED90B

* 144Hz VRR : B6, MRGB9MB, MRGB85B, 85/75/65/55QNED90B, QNED85B, QNED82B, QNED8MB

U

0.1ms Pixel Response Time

*Apply to : 2026 OLED TVs

- **Excellent gaming performance** of OLED with it's the **fastest response Time**

OLED does not require extra technology to prevent inverse ghost effect unlike LCD. LG OLED presents instantly and accurately display its vivid and colorful images as gamer's intent in mind with its self-lit technology.

The ClearMR and DSC logo programs provide consumers with **a true quality benchmark for evaluating high-quality transmission motion blur performance.**

F

ClearMR Certified by VESA

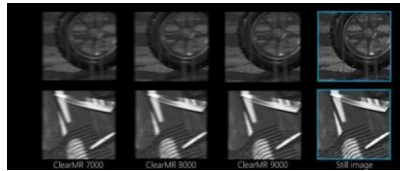

*Apply to : W6, G6, C6, B6 (97" excluded)

- Clear Motion Ratio (ClearMR) is a **standard for evaluating the blur level of the video on the display** in VESA by quantifying the ratio between clear and blurry pixels
- ClearMR 10000** Grade Certified for OLED W6, 83/77/65/55/48G6, C6

ClearMR 9000 for OLED B6
(except B6E)

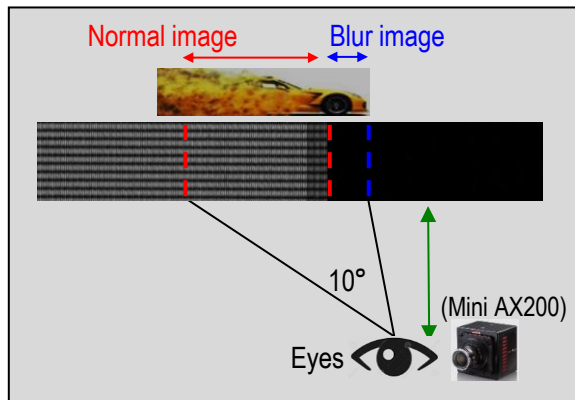

Higher CMR values obtained if the width of the blurred image is smaller or disappears more quickly

How to test it

- Quantify blur levels by stacking images taken within 1 Frame

- TV 165Hz video shooting with 10,000Hz high-speed camera
 $10,000/165 = 60$ pictures needed
- Calculate the ratio between clear and blurry pixels
Normal Image : Blue Image
= 90:1 = CMR 9000,
= 100:1 = CMR 10,000

F

VESA DSC

*Apply to : W6, G6, C6

- LG OLED evo is the world's first OLED TV to receive VESA DSC certification**, a visually lossless video compression technology designed to reduce the bandwidth required for high-resolution video signal transmission

DSC : Display Stream Compression

- Benefits of DSC

1) Higher Resolutions and Refresh Rates

- DSC enables the use of higher resolutions and refresh rates over existing interfaces like HDMI, which is crucial for gaming and high-definition video playback

2) Reduced Bandwidth Requirements

- By compressing the video stream, DSC significantly lowers the bandwidth needed for high-quality video transmission

3) Visually Lossless Quality

- The compression is designed to be visually lossless, meaning that the human eye cannot detect any difference between the compressed and uncompressed images under normal viewing conditions.

When playing cloud games on your TV, BT ultra-low latency technology provides optimized gaming performance for wireless gaming controllers

BT-Ultra low latency

26 New

*Apply to : 2026 OLED / MRGB / QNED / NANO UHD TVs

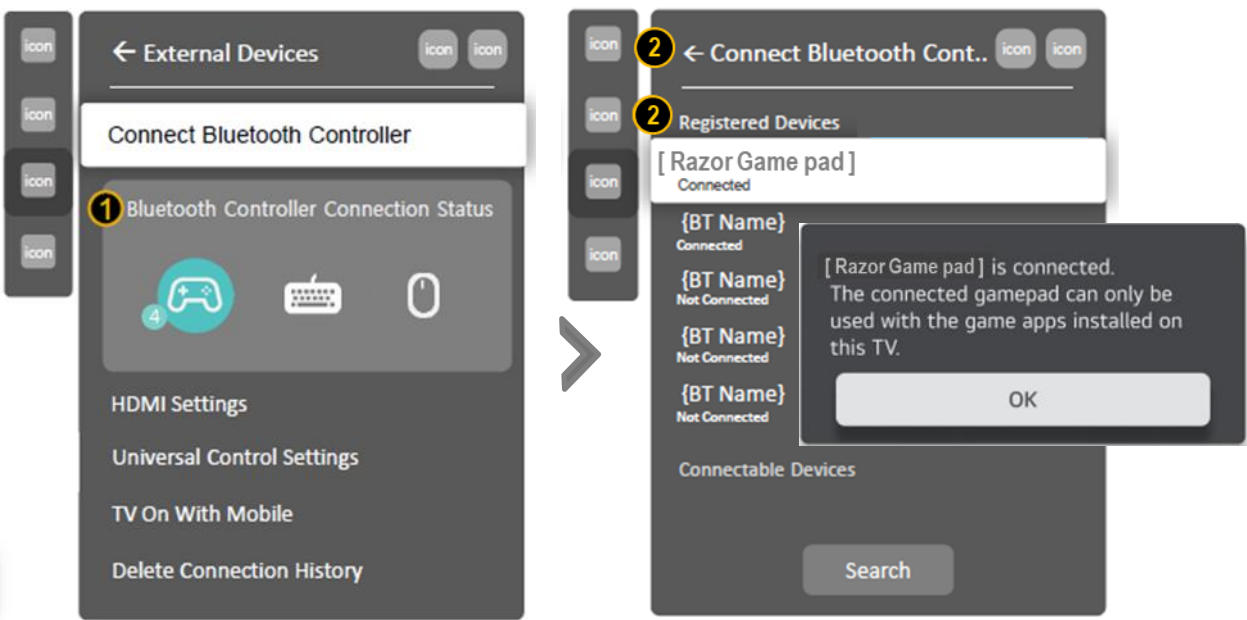

- When connecting to a BT ULL-certified controller, the latency of the game playing even in the cloud game is reduced to less than 3ms, providing the same experience as when connecting to a wired connection.

expected latency of game playing

ULL	conventional
3ms less	7.5 ~ 15ms

- to connect a BT-ULL controller, access Setting > General > External Devices menu and select
 - 1 Connect Bluetooth Controller to find and connect your own
 - 2 BT ULL controller.

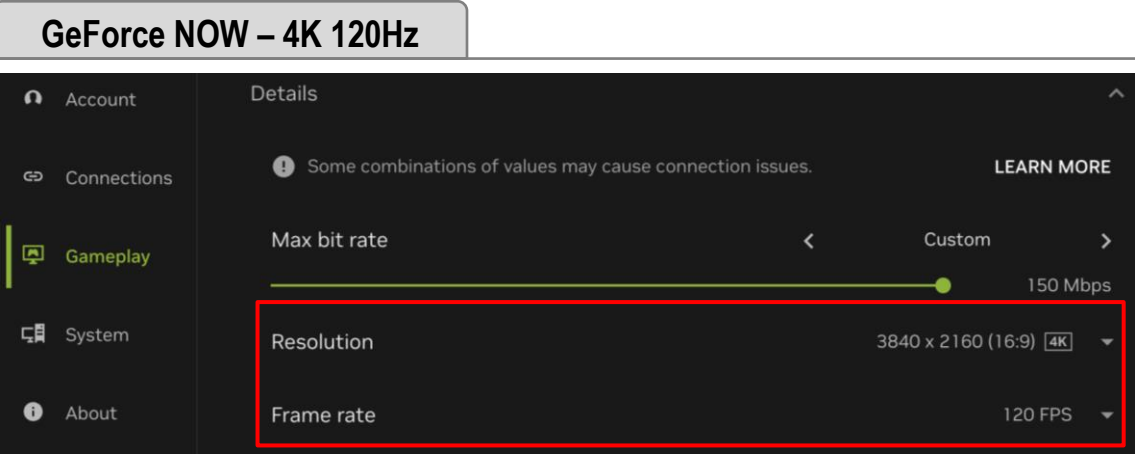

- Only one controller (game pad) can be connected in ULL mode, and there may be restrictions on using of other Bluetooth devices.
- Ethernet or Wi-Fi 5G connection is recommended.

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

Appendix. GeForce NOW – 4K 120Hz

LG TVs are leading the way as the world’s first to stream 4K at 120Hz with HDR through a GeForce NOW native app on supported LG TVs

- Select LG TV models support 4K 120Hz gameplay on GeForce NOW app
 - Experience ultra-smooth gameplay in stunning 4K resolution(3840x2160) at 120 frames per second through GeForce NOW app
- Use Flow(How to set up)
 - 1) Apps or LG Gaming Portal > Launch ‘GeForce NOW’ app
 - 2) Log in with GeForce NOW ‘Ultimate’ membership(subscription)
 - 4K streaming is not available on ‘Free’ or ‘Performance’ membership, which have a maximum streaming resolution of 1080p on Smart TVs
 - 3) In GeForce NOW app, Setting > Gameplay > Set up Resolution and Frame rate
 - Internet Speed Requirements : 45 Mbps for streaming 4K resolution at 120 FPS
 - * We recommend a hardwired Ethernet connection, or a 5GHz wireless router.

Differentiation

- Differentiation compared to `25 & Competitive Advantage Points
 - 120Hz support (first among Cloud gaming apps on Smart TV)
 - Samsung : 4K, LG : 4K + 120Hz
- Required disclaimer
 - GeForce NOW Ultimate membership subscription and an internet connection speed of at least 45 Mbps are required
 - A game controller may be required for gameplay
 - Availability may vary by country and TV model

Support Conditions

- Select models with webOS26, 84 countries

model	OLED W6, OLED G6, OLED C6, OLED CS6, MRGB 95B, MRGB 9MB	
country	NA	USA, Canada
	EU	Albania, Armenia, Austria, Azerbaijan, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Georgia, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Montenegro, Netherlands, Norway, Poland, Portugal, Republic of Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, United Kingdom

F First U Unique N New

LG TV's latest HDMI technology always updates new experiences such as games and fast videos

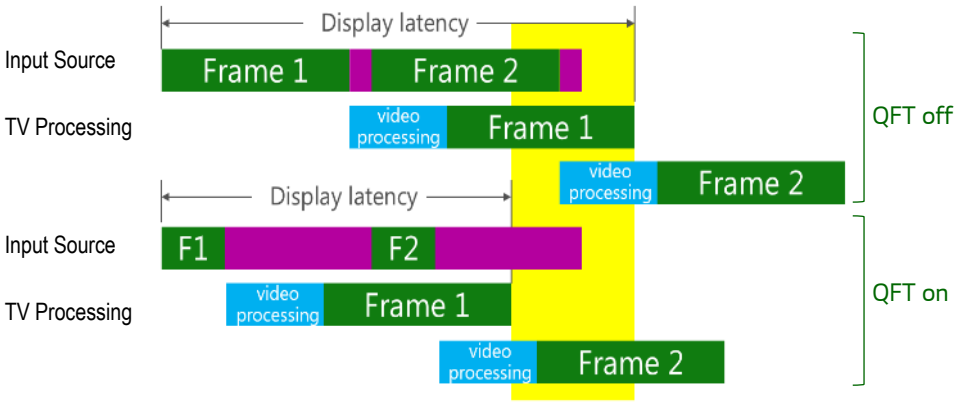

F

Quick Frame Transport

* Apply to : OLED, MRGB, QNED90B, QNED85B, QNED82B, QNED8MB, 98NU85

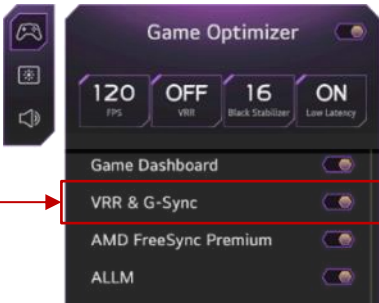

SoC Q26 / K26 / K24

- It is a technology that reduces display latency from the source to the TV by transmitting signals at a higher pixel clock than the actual image to process and express image signals faster on the TV

※ Reduce display latency by yellow mark area (TBU)

- Works with VRR signals, only when VRR is turned on in the game optimizer

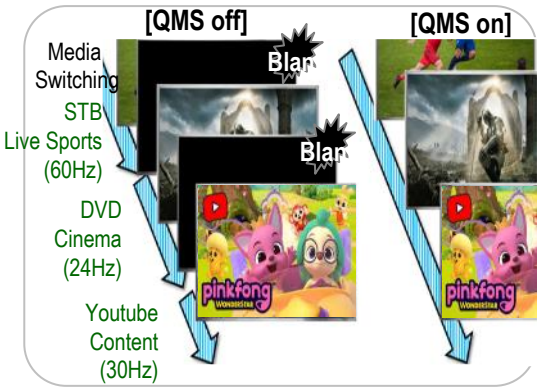

U

Quick Media Switching

* Apply to : OLED, MRGB, QNED90B, QNED85B, QNED82B, QNED8MB, 98NU85

SoC Q26 / K26 / K24

- QMS (Quick Media Switching) in HDMI2.1a is designed to eliminate A/V blackout period (1~3 second) by using VRR technology when an HDMI source device switches its video mode.
- As long as the resolution remains the same and only the frame rate changes, QMS will instantly switch between from 24Hz to 60Hz frame rate.

U

Auto Low Latency Mode

* Apply to : 2026 OLED / MRGB / QNED / UHD TVs

- When PC or other game device sends a signal to the TV it will cause the TV to automatically switch to low-latency, low-lag mode for gaming.

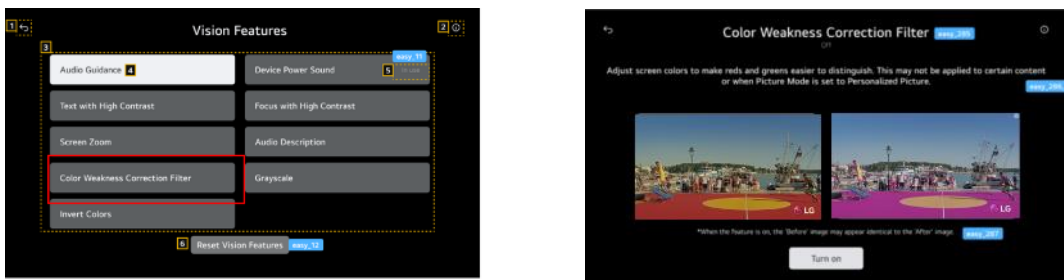

※ But a low latency setting may not be ideal for other types of viewing since some processing features on a TV may be stopped in order to reduce latency

F First U Unique N New

Implementing features for all customers, including people with disabilities, to use the TV conveniently

Color Weakness Correction Filter *All models with webOS26

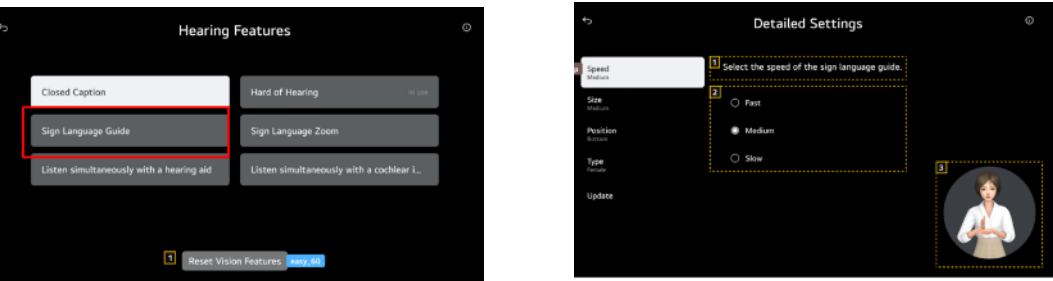

- This feature applies a correction filter designed for color weakness, especially those with red-green color blindness, to help make TV viewing more comfortable. Its concept is similar with the 'color weakness mode' in LG monitors.

- When the color weakness correction filter turned on, some of picture setting options are disabled

Sign Language Guide * webOS26 All model, Korea / NA only

- For the hearing impaired, the menu and description are read in sign language when selecting each menu with a remote control.

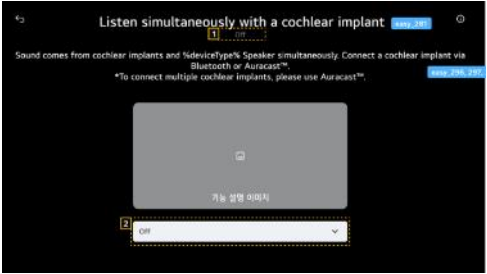

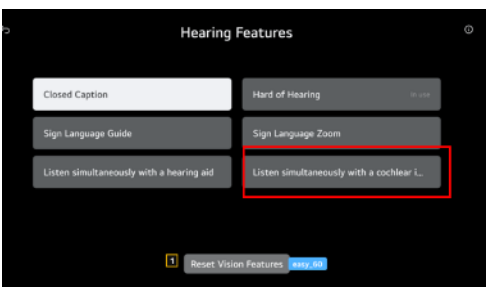

* Some menu (ex. sound) may not be supported

Listen simultaneously with a cochlear implant * webOS26 , BT5.3 ↑ model

- It helps hearing impaired person who has implanted cochlear to enjoy TV more comfort.
- Live and immersive content watching by connecting directly to the TV without purchasing/ connecting a separate TV streamer

※ validated cochlear implant device will be launched Feb '26. from Cochlear™ Nucleus®

Select connecting option as Auracast™

Products for everyone, made with the environment in mind

Part 3. 2026 Lifestyle TV Product Profile

I . LG StanbyME 2 Max (LX6B)

II. LG Gallery TV (LX7B)

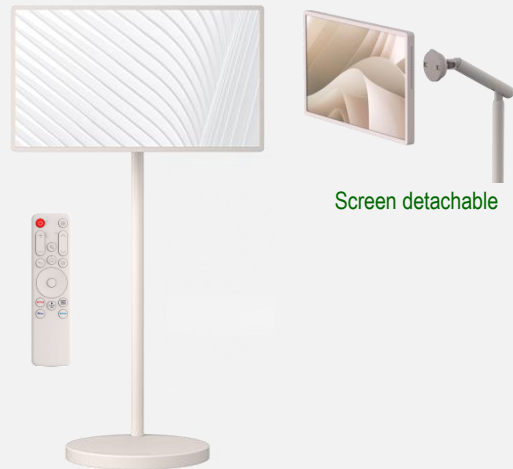

LG StanbyME 2 Max

1. Product Concept

An evolved smart screen that moves freely and can be used in various scenes

Basic Item 32LX6B

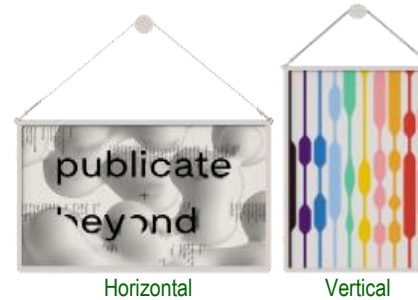

**Battery embedded Screen,
detachable Moving wheel stand
and Remote control**

- ※ Size: 32" (724(W) x 1108 ~ 1308(H) x 420(D) mm)
- ※ Resolution: UHD (3840x2160)
- ※ Weight 20.3kg (head part: 5.6kg)

Experience a variety of accessories (Optional)

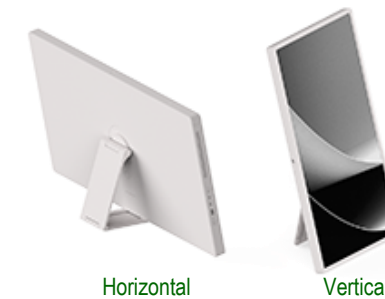

Strap & Wall Mount Holder

Easier wall mount with strap

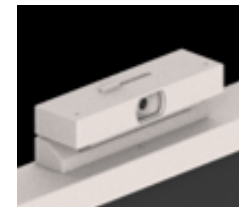

One Click Stand

On desk & table

Smart Cam

Dedicated Camera for a variety of experiences

Home training

Selfie Cam

- ※ Basic product: Battery embedded Screen, detachable Moving wheel stand, Remote Control
- ※ Accessories (sold separately): Strap & Wall Mount Holder / One Click Stand / Smart Cam, etc.
- ※ In-boxed item may vary according to the country.

2. Product Summary

Provides a more advanced and smarter user experience and improves usability

- Detachable for anywhere
- Enhanced battery life (up to 4.5hrs)
- Convenient charging with USB-C cable

- UHD Display
- α8 AI Processor Gen3

- Touch screen
- Voice Recognition with Voice ID
- Simple magnetic Remote Control

- Dolby Vision & Atmos
- Specialized content

1. Evolved smart screen experience

- Freely detachable
- Optimal viewing angle with improved moving wheel stand
- Improved battery life with USB-C cable
Charges up to 50% in 120 minutes with 140W charger

2. Clear UHD picture quality

- with UHD and the α8 AI Processor, enjoy clearer, richer picture and sound quality

3. Convenient usability with Intelligent Voice Recognition

- Voice ID supports far-field voice commands
- Improved practicality with easy-to-attach magnetic remote control

4. Optimized entertainment for lifestyle

- Dolby Vision with vivid color, sharper contrasts and richer details
- Dolby Atmos for immersive three-dimensional sound
- Diverse experiences with specialized content (Let's draw, LG Gallery+)

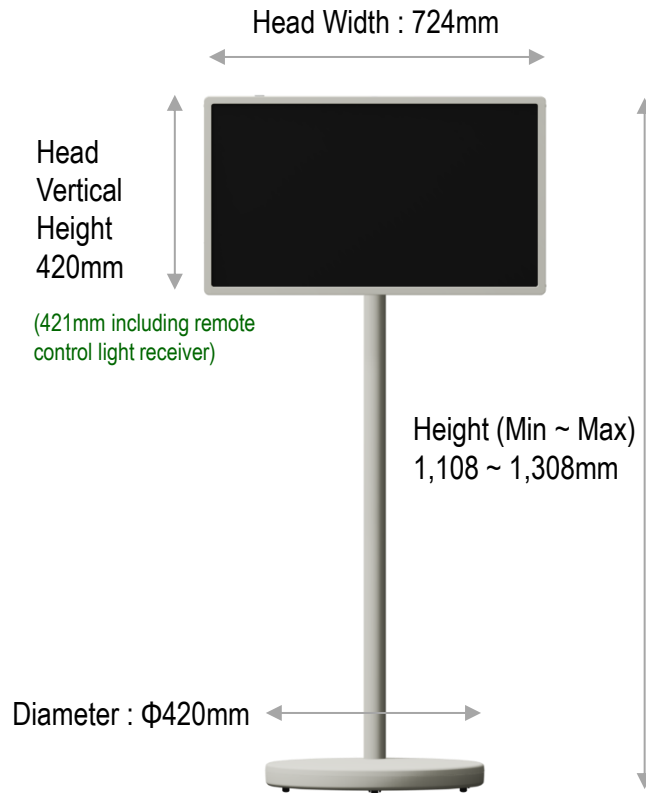

* This material is for use in LG Electronics' internal training only. Use of this material for any other purpose is strictly prohibited. Do not use this material as POP or any other public display, as doing so may be against commercial law. Images used are not owned by the company. Conceptual images are used to explain. The measurement is a typical value. Measurement data used are for LG's internal measurements using its own test methodology.

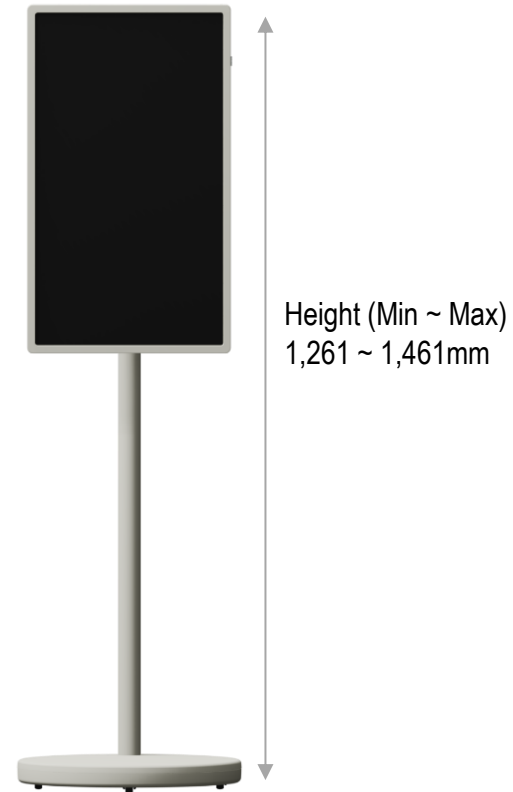

3. Design

Move freely with a moving wheel stand, adjust the screen angle, and even take it off when needed.

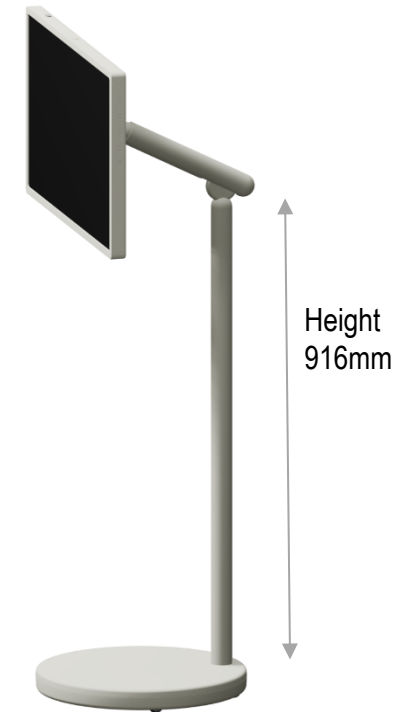

Front (Landscape mode)

Front (Portrait mode)

Side

Five discrete wheels at the base make it easy to glide from room to room or even out on the patio

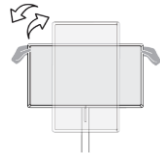

Keep by your side when you need and enjoy from the optimal angle

Rotating

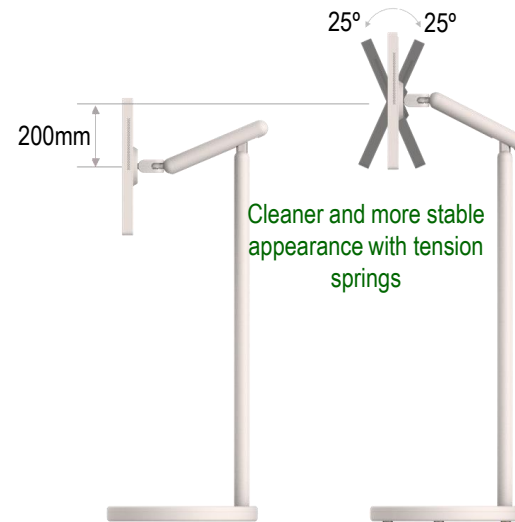

be rotated 90° clockwise

be rotated 90° counterclockwise

Tilting

be tilted forward 25°

be tilted backwards 25°

Swivel

be swiveled left 90°

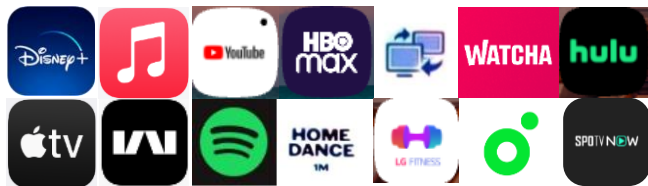

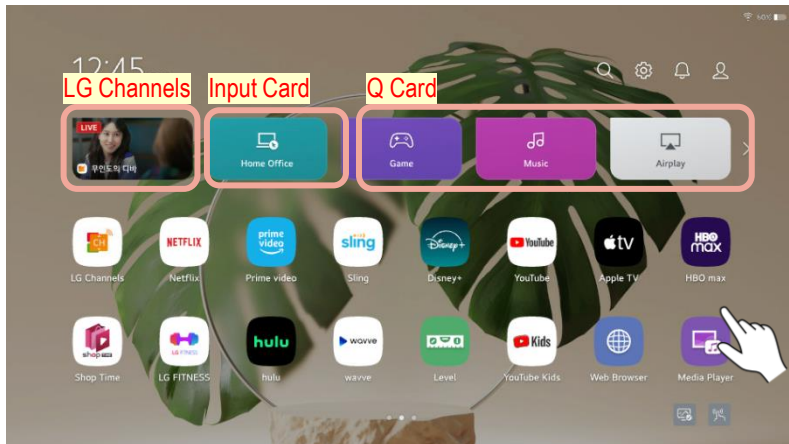

be swiveled right 90°

4. Home

Home

Upgrade

Enjoy a variety of service experiences.
Expand from the existing 3 Qcards to provide the same number as normal TVs.

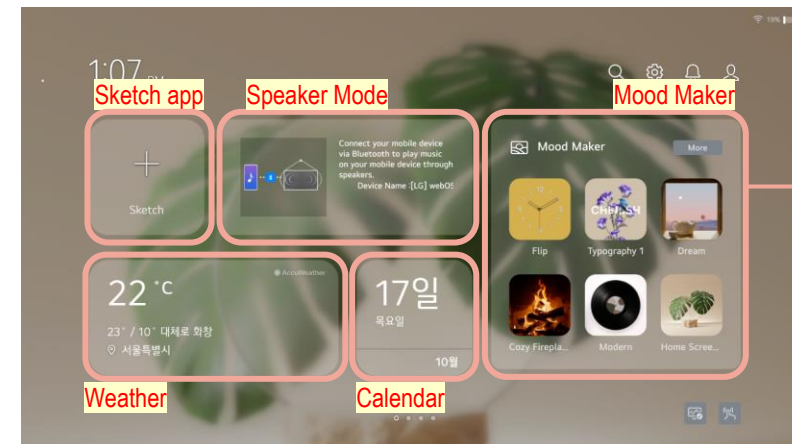

※ Disney+, WATCHA, Apple TV, Apple music, Spotify, SPOTV NOW, LG FITNESS, etc.

Use it more diversely by downloading additional apps from Apps.

Zeropage

Check simple life information, have fun with photos and music,
and easily access frequently used mood maker content.

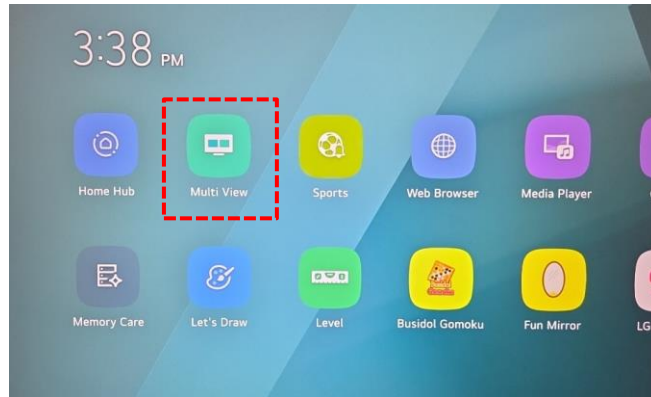

6 recently used
ambient themes

4. Home

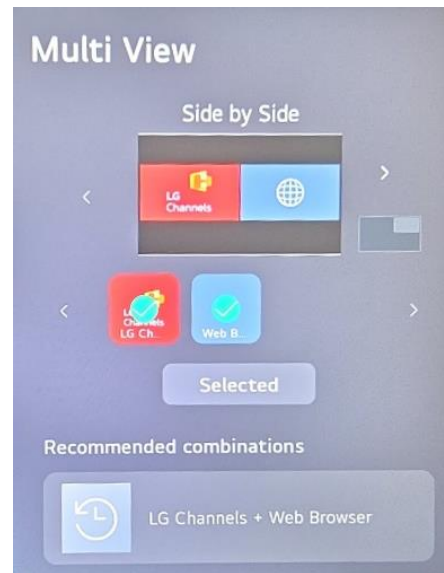

Multi View

Upgrade

Run two apps at the same time on one screen to maximize screen utilization.

Multi View

※ Supported app combinations include
- LG Channels, External Input, Screen Share (Browser), Miracast, YouTube

5. Unique eXperience

Provides a more advanced and smarter user experience and improves usability

USB C 1EA

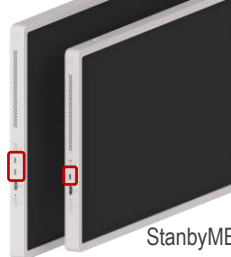

→

StanbyME 2 Max

USB C 2EA

DP ALT MODE USB-C

USB-C PD Charging

A diagram showing a transition from a single USB-C port to two USB-C ports. The ports are labeled 'DP ALT MODE USB-C' and 'USB-C PD Charging'. The StanbyME 2 Max is shown with two ports, while the StanbyME 2 has one.

StanbyME 2

Wi-Fi 5

→

StanbyME 2 Max

Wi-Fi 6E

A diagram showing a transition from Wi-Fi 5 to Wi-Fi 6E. An image of a person in traditional Japanese attire is shown on the screen.

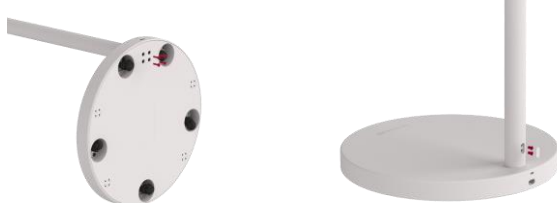

StanbyME 2

Fasten under the
stand base

→

StanbyME 2 Max

Fasten to the back
of the stand pole

A diagram showing a transition from a fastener under the stand base to a fastener on the back of the stand pole. The StanbyME 2 Max is shown with the fastener on the back of the stand pole.

Improved remote control reception sensitivity

A diagram showing a transition from a remote control to a screen. A red arrow points to the bottom of the screen, indicating the location of the IR receiver.

IR receiver moved to the bottom of the screen

5. Unique eXperience

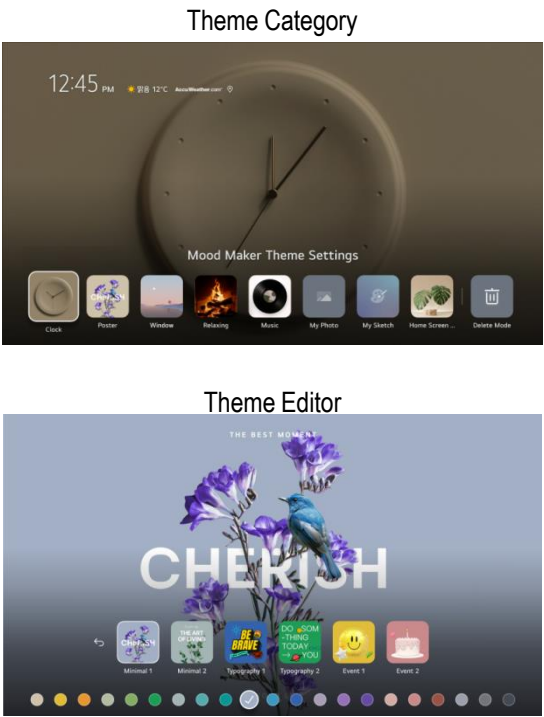

Let's Draw App

Draw your own drawing with the Sketch app and use it as a home wallpaper or mood maker theme

Mood Maker

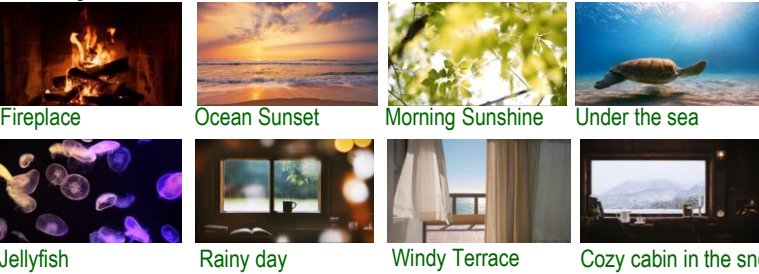

Creates various moods and more diverse themes, and edit them to suit taste

Provides various categories such as clock, poster, window, healing, music, my photo,
※ The selected video/image can be used both horizontally and vertically.

Change the background of the selected theme to suit your taste
Clock (background color),
Poster (background color),
Window (window style)

Relaxing Themes

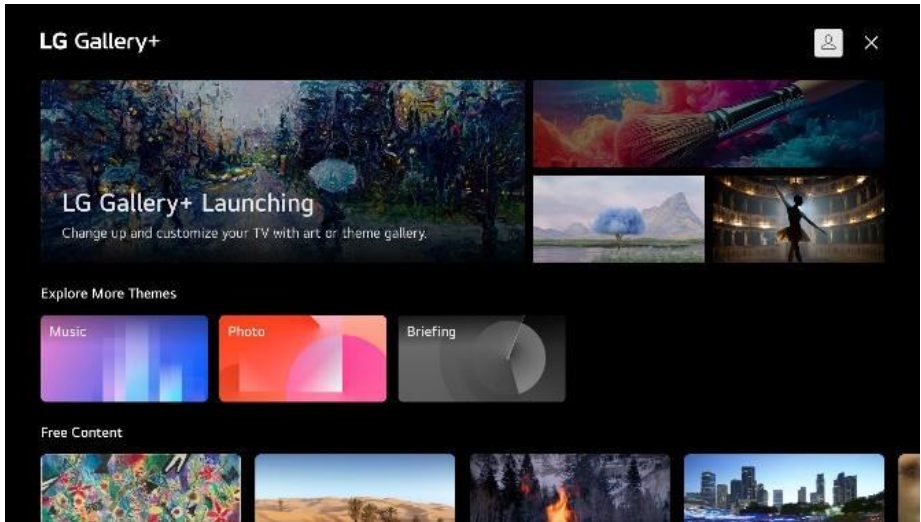

5. Unique eXperience

LG Gallery +

Upgrade

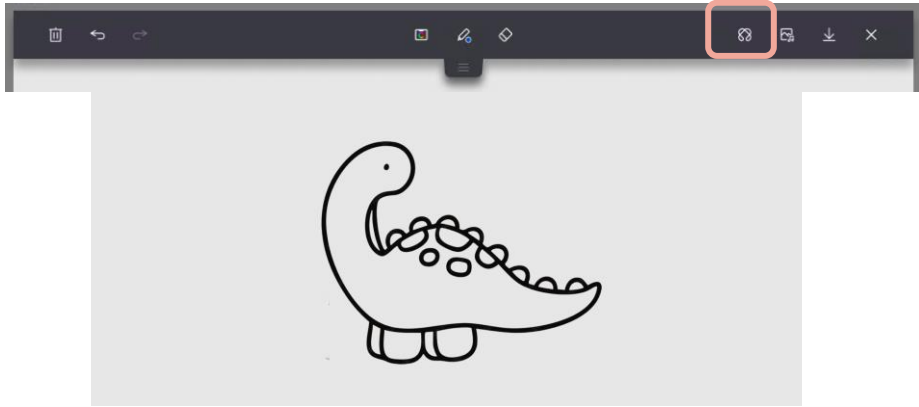

Provide a touch-optimized 'Gallery+' service accessible from the Home app, with Mood Maker integration available.

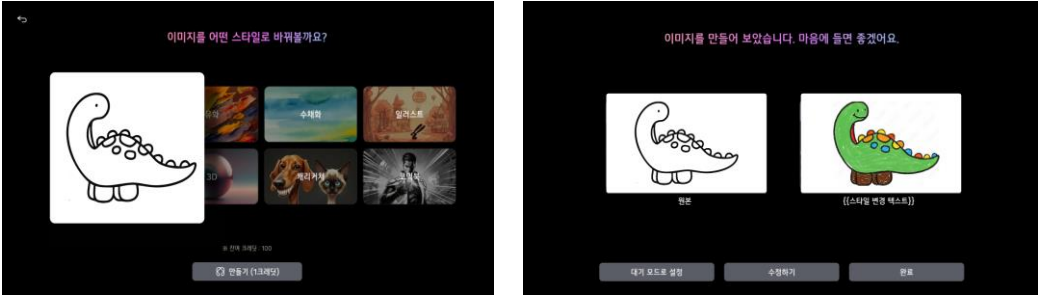

Let' Draw App + AI

Upgrade

In the Let's Draw app, integrate with LG Gallery+ to leverage generative AI based on my drawings.

Users can upgrade their artwork with just one touch using the LG Gallery+ AI Art.

6. Easy Device Control

USB-C connect, Touch lock release, Voice ID

StanbyME 2

USB-C 1ea

- PD, DP-Alt, v2.0

Charging via a PD adapter is not available during dual monitor operation.

StanbyME 2 Max

Upgrade

USB-C 2ea

- PD, DP-Alt, v2.0 – 1ea
- PD, v2.0 – 1ea

The dual monitor display can be used while charging via a PD adapter at the same time

Touch lock

Securely unlock your device with a simple three-press power button sequence for added convenience.

Voice ID

Users can control the device solely through far-field voice commands.
